

# Prophecy Drills 120.9 Meters Grading 1.26 g/t PGM+Au, 0.36% Ni, 0.30% Cu within 457 Meters Grading 0.47% NiEq at Yukon Wellgreen Project

26.09.2011 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA -- (Marketwire) -- 09/26/11 -- Prophecy Platinum Corp. ('Prophecy Platinum' or the 'Company') (TSX VENTURE: NKL)(OTCQX: PNIKF)(FRANKFURT: P94P) announces the drill results received from its 2011 drilling Wellgreen PGE-Ni-Cu Project. Borehole WS11-188 encountered 457 meters of mineralization grading 0.47% NiEq (including 0.72 g/t Pt+Pd+Au) from surface to the footwall contact. Within this larger swath of mineralization, the hole encountered a high grade section of 17.8 meters of 3.14 g/t Pt+Pd+Au, 1.03% Ni, 0.74% Cu (1.77% NiEq).

The hole was drilled completely outside of current resource boundaries, between the East Zone resource and the West Zone resource that was reported in the company's July 14, 2011 press release. The drill results are tabulated below:

Table 1. WS11-188 Drill hole Composites (in metres)

From	To	Length (m)	Ni %	Cu %	Pt+Pd+Au	NiEq	From surface (m)
7.53	464.91	457.38	0.29	0.18	0.72	0.47	7.07

including...

From	To	Length (m)	Ni %	Cu %	Pt+Pd+Au	NiEq	From surface (m)
268.38	389.29	120.91	0.36	0.30	1.26	0.67	252.19

From	To	Length (m)	Ni %	Cu %	Pt+Pd+Au	NiEq	From surface (m)
280.72	298.55	17.83	1.03	0.75	3.14	1.77	263.79

Table 2. PGM+AU Composites from WS11-188

From	To	Length	Pt g/t	Pd g/t	Au g/t	Pt+Pd+Au	From surface (m)
7.53	464.91	457.38	0.34	0.33	0.05	0.72	7.07

including...

From	To	Length	Pt g/t	Pd g/t	Au g/t	Pt+Pd+Au	From surface (m)
268.38	389.29	120.91	0.63	0.54	0.08	1.26	252.19

From	To	Length	Pt g/t	Pd g/t	Au g/t	Pt+Pd+Au	From surface (m)
280.72	298.55	17.83	1.33	1.64	0.17	3.14	263.79

Notes:

1. NiEq calculations are based on long range pricing index of \$US 9.52/lb nickel, \$US 2.96/lb copper, \$US 15.78/lb cobalt, \$US 1,085/troy oz gold, \$US 1,776/troy oz platinum, and \$US 689/troy oz palladium. The equation for NiEq value is as follows:
2. 
$$\text{NiEq} = ((\text{Ni grade} \times \text{Ni price} \times 22.04622) + (\text{Cu grade} \times \text{Cu price} \times 22.04622) + (\text{Co grade} \times \text{Co price} \times 22.04622) + (\text{Au grade} \times \text{Au price} \times 0.02916) + (\text{Pt grade} \times \text{Pt price} \times 0.02916) + (\text{Pd grade} \times \text{Pd price} \times 0.02916)) / (\text{Ni price} \times 22.04622)$$
3. WS-188 was drilled at an inclination of -70 degrees; reported widths are intersected widths and not true widths.

The high grade intercept located between the two resources is significant in that it not only demonstrates that the East and West zone resource form a single, geologically contiguous body, but also indicates that the higher grade material in the East Zone continues to the west and at depth at Wellgreen.

The West Zone, contributing approximately 24% of the Wellgreen inferred resource (see table 3 below) is currently mostly defined in the upper 200 meter portion from surface, with very little drilling beyond 250 meters from surface.

The results of WS11-188 indicate the exploration upside within immediate proximity to the already defined Wellgreen resource, which is shown open to depth (West and East), and past the east boundary of the East Zone.

Table 3. Wellgreen Indicated and Inferred Resource Totals.

NiEq% cutoff	Category	Zone	Tonnes	Ni Eq%	Pt (g/t)	Pd (g/t)	Au (g/t)	PGM+Au (g/t)	Ni (%)	Cu (%)
0.4	Indicated	East	14,308,000	1.36	0.99	0.74	0.52	2.25	0.69	0.62
0.4	Inferred	East	219,327,000	0.76	0.54	0.45	0.26	1.25	0.39	0.34
0.4	Inferred	West	69,919,000	0.67	0.50	0.34	0.12	0.96	0.34	0.38
Total	inferred		289,246,000	0.74	0.53	0.42	0.23	1.18	0.38	0.35

Metal	Indicated	Inferred
Nickel (Ni)	0.22 Billion lbs.	2.42 Billion lbs.
Copper (Cu)	0.20 Billion lbs.	2.23 Billion lbs.
Platinum (Pt)	0.46 Million oz.	4.93 Million oz.
Palladium (Pd)	0.34 Million oz.	3.91 Million oz.
Gold (Au)	0.24 Million oz.	2.14 Million oz.
PGM+Gold	1.04 Million oz.	10.97 Million oz.

Based on resource estimated at 0.4% NEq cut-off, and 100% metals recoveries

Source: Wardrop Technical Report on Wellgreen  
dated July 21, 2011

Currently, approximately 2,300 meters of drilling has been completed on the property in the 2011 exploration season. Prophecy Platinum is continuing with its drilling program and intends to release more results as assays are completed. Separately, the Preliminary Economic Assessment (PEA) study by Wardrop Engineering is proceeding on target and the Company is expected to release preliminary pit shell parameters in October to demonstrate the potential open-pittable resource within the Wellgreen project.

Visit [www.prophecyplat.com](http://www.prophecyplat.com) for drill cross section and location maps.

This news release has been reviewed and approved by Danniell Oosterman, P.Geo., an independent consultant and a Qualified Person as defined in NI 43-101.

#### Quality Control and Quality Assurance

Prophecy Platinum executes a quality control program to ensure best practice in sampling and analysis. Samples are cut and split for assay with the remaining sample retained for reference. Blanks, Standard Reference Material (SRM), and duplicates were inserted into the sample stream every 20th sample. A duplicate sample is taken every 20th sample of core. The selected sample is sawn in half and then sawn in half again. The quartered core is then placed into two different sample bags with different sample numbers and sealed. The SRM material comes from Natural Resources Canada and Analytical Solutions Limited. These were inserted into the sample stream immediately after the second duplicate. The SRMs used are WMS-1, WPR-1 and WGB-1. Sample Blanks are obtained from two sources; granodiorite from a local quarry and garden marble from hardware stores in Whitehorse, Yukon. A Blank sample is inserted into the sample stream after the SRM. Assayed samples are transported in sealed and secured bags for preparation at ALS

Chemex Prep Lab located in Whitehorse, Yukon. Pulverized (pulp) samples are shipped for analysis to ALS Chemex Assay Laboratory in Vancouver, B.C. ALS Chemex is an ISO/IEC 17025:2005 accredited laboratory and registered under ISO 9001:2000.

Quality assurance and quality control are monitored using scatterplots, Thompson-Howarth plots and statistical analysis to ensure duplicates, blanks and standard data are reliable and indicate robustness of overall results. ALS Chemex quality-assurance procedures are also included in this process.

#### About Prophecy Platinum

Prophecy Platinum Corp. is a Canadian based Nickel PGM exploration company with projects in Canada, Argentina and Uruguay. Prophecy Platinum's flagship Wellgreen PGM-Cu-Ni project is in Yukon Territory, Canada and the Lynn Lake project is located in Manitoba, Canada. Further information can be found at [www.prophecyplat.com](http://www.prophecyplat.com).

ON BEHALF OF THE BOARD OF DIRECTORS of Prophecy Platinum Corp.

John Lee, Chairman

**Forward Looking Statements:** This news release includes certain statements that may be deemed 'forward-looking statements'. All statements in this release, other than statements of historical facts, including, without limitation, statements potential mineralization, the estimation of mineral resources, the realization of mineral resource estimates, interpretation of prior exploration and potential exploration results, the timing and success of exploration activities generally, the timing and results of future resource estimates, permitting time lines, metal prices and currency exchange rates, availability of capital, government regulation of exploration operations, environmental risks, reclamation, title, and future plans and objectives of the company are forward-looking statements that involve various risks and uncertainties.. Although Prophecy believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Forward-looking statements are based on a number of material factors and assumptions. Factors that could cause actual results to differ materially from those in forward-looking statements include failure to obtain necessary approvals in respect of the Transaction, unsuccessful exploration results, changes in project parameters as plans continue to be refined, results of future resource estimates, future metal prices, availability of capital and financing on acceptable terms, general economic, market or business conditions, risks associated with operating in foreign jurisdictions, uninsured risks, regulatory changes, defects in title, availability of personnel, materials and equipment on a timely basis, accidents or equipment breakdowns, delays in receiving government approvals, unanticipated environmental impacts on operations and costs to remedy same, and other exploration or other risks detailed herein and from time to time in the filings made by the companies with securities regulators. Readers are cautioned that mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral exploration and development of mines is an inherently risky business. Accordingly the actual events may differ materially from those projected in the forward-looking statements. For more information on Prophecy and the risks and challenges of their businesses, investors should review their annual filings that are available at [www.sedar.com](http://www.sedar.com).

'Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.'
