

# Pacific Potash Provides Drilling Update on Exploration Activities at Its Provost Area Potash Projects

03.11.2011 | [CNW](#)

VANCOUVER, Nov. 3, 2011 /[CNW](#)/ - Pacific Potash Corporation (TSX-V: PP) (FSE: P9P)(the "Company") is pleased to report that the 11-29-37-1W4m well, located within the company's 100% owned Provost Potash Property has been drilled and logged to a depth of approximately 1460-m. This well was located west of the Alberta-Saskatchewan Border, near the community of Provost Alberta, and represents one of the first well's completed in the province to specifically targeted Potash.

[Grizzly Discoveries Inc.](#) ("Grizzly") and the Company have completed site preparations at the 10-11-40-1W4M location, the first well to be drilled within the 50:50 Property. The drill rig has been mobilized to the site and drilling should commence shortly.

The 50:50 Provost Property is jointly owned by Pacific Potash Corp. and Grizzly, and initial potash exploration drilling on the property in 2011 is funded jointly by Grizzly and Pacific in proportion to their respective 50% interest.

Within the region, the potash-bearing Patience Lake, member of the Prairie Evaporite formation, is anticipated to range from three to six metres thick, at depths of 1,300 to 1,450 metres. It is anticipated that this well will take approximately seven to 10 days to complete and log.

Jody Dahrouge, P.Geol, senior vice-president exploration of the company and a qualified person for the purposes of NI-43-101, has approved the preparation of the technical information in this news release.

## About Pacific Potash Corporation

Pacific Potash is engaged in the exploration and development of the Provost Potash Property and the surrounding potash claims located in the prolific Prairie Evaporite Formation, which is host to multiple conventional and solution potash mines. The company is also actively looking to acquire other prospective potash assets in North America.
