

# Tumi commences drilling at La Gloria, Sonora, Mexico

28.11.2011 | [CNW](#)

VANCOUVER, Nov. 28, 2011 /CNW/ - [Tumi Resources Limited](#) (the 'Company') (Pinksheets: TUMIF). Mr. David Henstridge, President, announces that a diamond drill program at the Company's La Gloria gold-tungsten-tin project has commenced.

This is the first diamond drilling undertaken at La Gloria that produced a small amount of tungsten ore by crude mining and concentrating methods in 1956. La Gloria is located about 250 km by road east of Hermosillo, Sonora and is held within two contiguous mineral claims totalling 200 hectares and are optioned from a private Mexican owner.

A total of five holes are proposed in this program with three holes on the sampling grid. One hole will be located on grid line 100 where a 32 m wide channel sample averaged 3.3 g/t gold, 958 ppm tungsten and 498 ppm tin. Two further holes will be drilled on grid lines 00 and 200, each 100m either side from the first hole. Another two holes are proposed elsewhere within the skarn body as an initial test of the extent of mineralization.

The qualified person for Tumi's projects, David Henstridge, a Fellow of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists, has visited the La Gloria gold-tungsten-tin project, Sonora, Mexico and has verified the contents of this news release.

On behalf of the Board,

'David Henstridge'  
David Henstridge, President & CEO

*Forward Looking Statements This Company Press Release contains certain 'forward-looking' statements and information relating to the Company that are based on the beliefs of the Company's management as well as assumptions made by and information currently available to the Company's management. Such statements reflect the current risks, uncertainties and assumptions related to certain factors including, without limitations, competitive factors, general economic conditions, customer relations, relationships with vendors and strategic partners, the interest rate environment, governmental regulation and supervision, seasonality, technological change, changes in industry practices, and one-time events. Should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described herein.*
