

Richmont Mines Inc. Announces Completion of 2011 Drilling Program at Wasamac

29.11.2011 | [Marketwired](#)

Updated Resource Calculation Expected in Mid-December

MONTREAL, 11/29/11 - [Richmont Mines Inc.](#) (TSX: RIC)(NYSE Amex: RIC), ('Richmont' or the 'Corporation') is pleased to announce that it has completed more than 50,000 metres of drilling in 2011 on its Wasamac property (the 'Property').

Highlights:

-- New 2011 drill results include: 2.45 g/t Au over 37.14 metres and 6.11 g/t Au over 4.01 metres in Zone 1, and 3.63 g/t Au over 12.87 metres and 2.96 g/t Au over 11.26 metres in Zone 3 (true width). In addition, 5.21 g/t Au over 12.0 metres (core length) has been cut outside the shear zone in the footwall of Zone 3;

-- Results from 46,795 metres of drilling in 2011 received; Winter 2012 drilling program being prepared;

-- Updated resource calculation planned for mid-December 2011; Preliminary Economic Assessment ('PEA') of the project anticipated for the end of Q1 2012.

Martin Rivard, President and CEO, commented: 'Our exploration program on Wasamac has been the largest drill campaign in Richmont's history, and we are pleased by the work that has been accomplished by our exploration team. Drill results continue to reaffirm our optimism for Wasamac's potential for an underground bulk-mining operation. We now have results from 46,795 metres of surface exploration drilling in 2011, and are currently interpreting this data for an updated resource calculation for Wasamac, which we expect to finalize in mid-December. Following this, we plan to complete a PEA for the Property at the end of the first quarter of 2012.'

Additional details about the Wasamac Property

As of December 31, 2010, the Wasamac property had estimated Measured and Indicated Resources of 5,093,180 tonnes grading 2.51 g/t Au for 411,073 ounces of gold, and Inferred Resources of 11,515,020 tonnes grading 2.72 g/t Au for 1,007,875 ounces of gold.

The 7.58 k (757.65 hectare) Wasamac property is located 15 km west of Richmond's headquarters in Rouyn-Noranda, Quebec, in the heart of the Abitibi gold mining district and is less than 10 km east of the Francoeur Mine. The past-producing Wasamac Mine produced a total of 1.9 million metric tonnes at an average grade of 4.16 g/t Au between 1965 and 1971. This production generated 252,923 ounces of gold, mostly from the Main Zone.

About Richmond Mines Inc.

Richmont has produced over 1,200,000 ounces of gold from its operations in Quebec, Ontario and Newfoundland since beginning production in 1991. The Corporation currently produces gold from its Island Gold and Beaufor mines, and is currently advancing its Francoeur Mine to commercial production, which should increase Richmont's production to 100,000 ounces of gold on an annual basis. With extensive experience in gold exploration, development and mining, the Corporation is well positioned to cost-effectively build its Canadian reserve base through a combination of organic growth, strategic acquisitions and partnerships. Richmont routinely posts news and other important information on its website (www.richmont-mines.com).

Forward-Looking Statements

This news release contains forward-looking statements that include risks and uncertainties. When used in this news release, the words 'estimate', 'project', 'anticipate', 'expect', 'intend', 'believe', 'hope', 'may' and similar expressions, as well as 'will', 'shall' and other indications of future tense, are intended to identify forward-looking statements. The forward-looking statements are based on current expectations and apply only as of the date on which they were made.

The factors that could cause actual results to differ materially from those indicated in such forward-looking statements include changes in the prevailing price of gold, the Canadian-United States exchange rate, grade of ore mined and unforeseen difficulties in mining operations that could affect revenue and production costs. Other factors such as uncertainties regarding government regulations could also affect the results. Other risks may be set out in Richmont Mines' Annual Information Form, Annual Reports and periodic reports.

Cautionary note to US investors concerning resource estimates

Information in this press release is intended to comply with the requirements of the Toronto Stock Exchange and applicable Canadian securities legislation, which differ in certain respects with the rules and regulations promulgated under the United States Securities Exchange Act of 1934, as amended ('Exchange Act'), as promulgated by the SEC. The reserve and resource estimates in this press release were prepared in accordance with Regulation 43-101 adopted by the Canadian Securities Administrators. The requirements of Regulation 43-101 differ significantly from the requirements of the United States Securities and Exchange Commission (the 'SEC').

U.S. Investors are urged to consider the disclosure in our annual report on Form 20-F, File No. 001-14598, as filed with the SEC under the Exchange Act, which may be obtained from us (without cost) or from the SEC's web site: <http://sec.gov/edgar.shtml>.

Regulation 43-101

The exploration program was conducted by qualified persons as defined by Regulation 43-101. Specifically, the program was overseen by Mr. Daniel Adam, Geo., Ph.D., Exploration Manager, a qualified person as

defined by Regulation 43-101, and an employee of Richmond Mines Inc. The analyses were conducted at the Lab-Expert laboratory in Rouyn-Noranda, Quebec, by means of fire assay fusion with atomic absorption (AA) and gravimetric finish. 20% of samples (pulp and rejects) of the mineralized zones are being sent to the Techni-Lab (Actlabs) laboratory in Ste-Germaine-Boule.
