

# Lakeland Resources Inc. Expands the Midas Gold Property with Acquisition of New Claims

20.04.2011 | [CNW](#)

VANCOUVER, April 20 /CNW/ - [Lakeland Resources Inc.](#) (TSXV: LK) (the "Company" or "Lakeland") is pleased to announce that it has expanded the Midas Gold Property through the staking of 64 additional claim units. The newly-staked ground is contiguous to the existing property and has more than doubled the size of the land package increasing it by approximately 1,000 hectares. The Midas Property now consists of 10 unpatented mining claims encompassing 107 claim units (1,712 hectares).

Lakeland recently completed a five hole winter drill program at the Midas Property for a total of approximately 850 metres. The program was designed to test targets that were identified following the completion of an Induced Polarization ground geophysical survey. All five holes have been logged, sampled, split and sent in for assay with results expected in the next two weeks.

"The Midas Property holds great promise for a new discovery in an area of the Wawa Camp that has seen relatively little in the way of diamond drilling," stated Jonathan Armes, President of Lakeland. "The addition of the new ground protects our current land holdings and bolsters our position within the camp."

The Midas Gold Property is road accessible and is located within the Michipicoten Greenstone Belt in north-central Ontario. The project lies approximately 50 kilometres northeast of the town of Wawa and approximately 20 kilometres southeast of [Richmont Mines'](#) (TSX: RIC) Island Gold Mine and Mill and [Prodigy Gold's](#) (TSXv: PDG) Magino Gold Project.

The newly-acquired ground hosts at least five historic gold showings according to geological reports on file with the Ontario Geological Society MDI database. The ground will be included within and under the terms of the original option agreement for the Midas Property.

Lakeland also announces that the stock option grant announced in the Company's news release of March 7, 2011 has been canceled. Subject to the acceptance of the TSX Venture Exchange, the Company will be granting a total of 250,000 incentive stock options to newly-appointed directors Bob Duess and Daniel Wilson. Each stock option will be exercisable into one common share of the Company at a price of \$0.15 per share for a period of five years.

## NI 43-101 Disclosure

Robert Duess, P. Geo, is the Qualified Person, as that term is defined in National Instrument 43-101, who has reviewed and approved the technical information in this press release.

## About Lakeland Resources Inc.

Lakeland Resources Inc. is focused on gold exploration in Canada. The Company commenced trading on the TSX Venture Exchange on August 19, 2010 after completing its Qualifying Transaction.

*Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*

*Statements in this document which are not purely historical are forward-looking statements, including any*

*statements regarding beliefs, plans, expectations or intentions regarding the future. Forward-looking statements in this news release include that drilling results from the Midas Property are expected to be received in the next two weeks, that the newly acquired claims will be included within and under the terms of the original option agreement for the Midas Property, and that subject to TSX Venture Exchange acceptance the company will be issuing 250,000 incentive stock options to Bob Duess and Daniel Wilson.*

*It is important to note that actual outcomes and the Company's actual results could differ materially from those in such forward-looking statements. Risks and uncertainties include economic, competitive, governmental, environmental and technological factors that may affect the Company's operations, markets, products and prices. Factors that could cause actual results to differ materially may include misinterpretation of data; that we may not be able to get equipment or labour as we need it; that we may not be able to raise sufficient funds to complete our intended exploration and development; that our applications to drill may be denied; that weather, logistical problems or hazards may prevent us from exploration; that equipment may not work as well as expected; that analysis of data may not be possible accurately and at depth; that results which we or others have found in any particular location are not necessarily indicative of larger areas of our properties; that we may not complete environmental programs in a timely manner or at all; that market prices may not justify commercial production costs; and that despite encouraging data there may be no commercially exploitable mineralization on our properties. Readers should refer to the risk disclosures outlined in the Company's Management Discussion & Analysis of its audited financial statements filed with the British Columbia Securities Commission.*
