KELOWNA, BC, Sept. 27, 2011 /[CNW](#)/ - [Georox Resources Inc.](#) ("Georox" or the "Corporation") (GXR: TSX-V; OF6A:FRA) is pleased to provide the following update with respect to its drilling activities relating to the Silverdale Lands near Lloydminster, Saskatchewan.

Sparky Non Channel Project

Through its joint venture partner/operator, Georox has drilled and cased seven wells in the initial drilling program. A seventh well was added to the original six wells following the approval to reduce the drilling spacing unit for it. All seven wells have been completed, equipped and production has been tested and will be optimized over the next several weeks.

Gross production for the seven wells was 367 bopd for the week ending September 13, 2011 and Georox's 15% interest share is 55 bopd. Georox's total corporate production is approximately 100 bopd.

The Company has earned its 15% interest on the farm-out lands consisting of 1040 acres at a cost of \$600,000 following the completion of the wells.

General Petroleums Channel Project

The joint venture partner in the second project has identified 14 to 18 potential drilling locations for horizontal oil wells in the Channel Project. The pooling of the Lands with an adjacent producer to form a larger area of common interest has been completed and will yield a pooled working interest of 6.9% to Georox in approximately 840 acres (the "pooled lands"). A 3D seismic program and interpretation has been completed on the pooled lands. The drilling of four horizontal wells is expected to commence in the later part of the fourth quarter of 2011 on the pooled lands. After an evaluation period, a further 14 horizontal wells could be drilled in 2012 on the pooled lands.
