

# Standard Graphite Corp. Completes TDEM Survey on Little Bryan

22.02.2012 | [Marketwired](#)

VANCOUVER, Feb. 21, 2012 - [Standard Graphite Corp.](#) (the "Company") (TSX VENTURE: SGH) is pleased to announce that it has completed the TDEM Survey of the Little Bryan property. The interpretation of the airborne survey on the Little Bryan project has provided insights on the current mineralised zones and their extensions. The survey also outlined new significant potential graphite targets elsewhere on the project.

President and CEO Chris Bogart states, "Standard is extremely pleased by the EM survey on our Little-Bryan property, the first set of results from our graphite portfolio. Not only has it expanded potential graphite mineralization by several kilometres from the known graphitic trenches but has also outlined a second near-surface conductive trend lying approximately one kilometre to the North. This second conductor appears very continuous and extends for over 5km along strike in association with calc-silicates/marble rocks. We are very pleased with the results and are looking forward to the completion of the airborne survey on our remaining properties both in Ontario and Quebec."

The Little-Bryan Property is located some 140km of Ottawa in Renfrew County and consists of 15 claims covering some 2800ha. During the month of January 2012, an airborne TDEM survey conducted by Prospectair Geosurveys and was flown over the three (3) properties located in Ontario to evaluate the extent of the known occurrences and help in the discovery of new mineralization. These results will greatly improve Standard's ability to orient the fieldwork. This survey has been completed and the company is expecting to release the remaining results of the survey shortly.

Standard Graphite is currently preparing a spring exploration programs on its Ontario Projects scheduled to begin on April 1, 2012.

Antoine Fournier, P. Geo., manages Standard's exploration and development programs and is the Qualified Person as defined by National Instrument 43-101. He supervised the preparation of the technical information in this release.

## ON BEHALF OF THE BOARD

Chris Bogart  
President & CEO
