## **About Avion Gold Corporation**

Avion is a Canadian-based gold mining company focused in West Africa that holds 80% of the Tabakoto and Segala gold projects in Mali. Gold production commenced at these projects in 2009 with approximately 51,290 ounces produced. 2010 production was 87,630 ounces of gold. 2011 production was 91,200 ounces of gold. The current mineral reserve estimate (as of January 1, 2011) of 7.24 million tonnes grading 3.92 g/t Au totaling 913,100 ounces of gold (proven and probable), for the Tabakoto project property, demonstrates several sources of excellent grade open pit and good grade underground mineral resources thus providing significant flexibility for Avion's future mining plans. The Company has developed an underground mine at the Tabakoto deposit, and is developing another underground mine at the Segala deposit. The Tabakoto project property also contains several producing open pit mines. Production sustainability will continue to be supported by exploration programs over an approximately 600 km2 exploration package that both surrounds and is near to the Company's existing mine infrastructure, and contains mineral resources on the Kofi property. Additionally, mineral resources have grown considerably at Avion's 1,600 km2 Hounde exploration property in Burkina Faso. Aggressive exploration programs are underway at the Tabakoto, Kofi and Hounde properties for 2012. Avion continues to progress towards its short term goal of 200,000 ounces of gold per year and a longer term goal of 400,000 to 500,000 ounces of gold per year through development of its exploration properties. Avion has a highly skilled management team, with a focus on growth and consolidation within West Africa.
