

Low Interest Rates Have Investors Flocking to High Dividends From Exxon Mobil Corp. and General Electric Co.

09.04.2012 | [Marketwired](#)

The Paragon Report Provides Stock Research on Exxon Mobil Corp. and General Electric Co.

NEW YORK, NY -- (Marketwire) -- 04/09/12 -- Investors have continued to look towards dividend paying stocks as a result of low interest rates. While banks are more than happy to charge you more than 18 percent on your card balance, you would be lucky getting more than 1 percent on a one year deposit. According to a report by iMoneyNet the average money fund yields 0.03 percent. The Paragon Report examines the outlook for Dividend Paying stocks and provides equity research on [Exxon Mobil Corporation](#) (NYSE: XOM) and General Electric Company (NYSE: GE).

Yet treating stocks as income-generators comes with a cost. "Rather than viewing dividend stocks as a way to capture extra yield, in the past we have stressed that dividend stocks should simply be viewed as a slightly less risky form of stock investing," Jim Bianco of Bianco Research wrote this week. "As such, we should expect dividend-paying stocks to outperform during bear markets and underperform during bull markets."

The Paragon Report provides investors with an excellent first step in their due diligence by providing daily trading ideas, and consolidating the public information available on them. [Exxon Mobil Corp.](#) reported its total oil-and-gas production is expected to drop 3% in 2012 but that output will grow 1% to 2% per year above 2011 levels by 2016. The projections were revealed in slides presented at the company's annual analyst meeting in New York City. Exxon Mobil is the world's largest publicly traded oil company.

GE advanced technology wind turbines have been selected to power nine new wind projects in the province of Ontario, Canada, adding approximately 650 megawatts of clean energy to the province's electricity grid. When the projects are fully built out by 2015, GE wind turbines will be delivering approximately 1,200 megawatts of wind energy in Ontario, which is enough to power 320,000 homes.
