

# Urastar Gold Corp. Announces Drilling Intersects 67.1 Metres Grading 0.54 G/T Gold at El Antimonio

15.06.2012 | [The Newswire](#)

June 15, 2012 - VANCOUVER, Canada – [Urastar Gold Corp.](#) (“Urastar” or the “Company”) (TSX:URS) (FSE: 3U3) (OTCQX: URNRF) is pleased to provide an update on drilling results at the El Antimonio property located in Sonora State, Mexico.

Urastar is currently carrying out an extensive RC drilling program on the El Antimonio property and so far 27 holes have been completed. Significant intersections previously released included 29 metres grading 0.79 grams per tonne gold in hole EA-12-17 (See news release dated 6 June 2012). Recently received significant intercepts include the following:

| Hole     | From<br>(ft) | To<br>(ft) | Core<br>Interval<br>(ft) | From<br>(m) | To<br>(m) | Core<br>Interval<br>(m) | Au<br>(g/T) | Comment                                           |
|----------|--------------|------------|--------------------------|-------------|-----------|-------------------------|-------------|---------------------------------------------------|
| EA-12-19 | 130.0        | 305.0      | 175.0                    | 39.6        | 93.0      | 53.3                    | 0.29        |                                                   |
| EA-12-20 | 70.0         | 85.0       | 15.0                     | 21.3        | 25.9      | 4.6                     | 0.16        |                                                   |
| EA-12-21 | 75.0         | 295.0      | 220.0                    | 22.9        | 89.9      | 67.1                    | 0.54        | includes<br>170-180<br>(10ft)<br>@<br>3.65<br>g/T |

The Company considers these results highly significant and indicative of potential for a bulk tonnage gold deposit.

Drill cutting samples were submitted to ALS Minerals in Hermosillo for preparation. Sample analysis was done at ALS Minerals in North Vancouver, Canada for gold by the Fire Assay method on 30 gram subsamples with AAS finish. ALS is an independent ISO certified commercial laboratory. Quality control included monitoring results of certified reference standards, duplicates and blank samples submitted with the samples. Intervals are measured down the hole and may not represent true thickness.

Dr. Matt Ball, P.Geo., is a Qualified Person pursuant to National Instrument 43-101 who has reviewed the technical information contained in this news release.
