

New Millennium Iron Corp. Announces a \$12.8 Million Investment by TSMC in a Deep Water Dock With the Port of Sept-Îles for DSO Project

14.08.2012 | [Marketwired](#)

NOT FOR DISTRIBUTION TO US NEWSWIRE SERVICES OR DISSEMINATION IN THE UNITED STATES

CALGARY, ALBERTA -- (Marketwire - Aug. 14, 2012) - [New Millennium Iron Corp.](#) ("NML" or the "Corporation") (TSX:NML) announced today that Tata Steel Minerals Canada Ltd ("TSMC"), a joint venture between Tata Steel and NML, has signed an agreement with the Sept-Îles Port Authority providing TSMC with access to a minimum of 5 million metric tons of annual shipping capacity from the new multi-user deep water dock facility to be located in the Bay of Sept-Îles at Pointe Noire. The Sept-Îles harbour is an ideal location for year round shipping in large ore carriers to Tata Steel's European plants.

Dean Journeaux, President and CEO of NML, said: "Upon completion of the new dock facility made possible in part by this investment, TSMC's DSO project will be assured of long term shipping access to Tata Steel Europe's plants. The new dock will enable TSMC to reduce costs associated with loading of vessels and shipping to Europe. This will make the Project a very competitive supplier to the steelplants."

Port Agreement:

The facility in Phase I is designed to have a total capacity of 50 million metric tons annually and is expected to cost \$220 million. It is being financed by the Port of Sept-Îles, the Government of Canada and commitments from potential end-users. Construction is expected to be completed by the end of March 2014.

TSMC will invest \$12.8 million for its interest, payable in two instalments over a one year period, the first of which was paid at time of signing. As a result of this investment, TSMC will receive favourable shipping rates at the dock facility. TSMC has a take or pay obligation based on a discounted rate applied on 50% of the reserved capacity. TSMC is entitled under the agreement to transfer all or a portion of its annual capacity and the associated take or pay obligation to other users of the dock. The term of the contract is 20 years, with TSMC having the option to renew for four further five year terms.

About New Millennium

The Corporation controls the emerging Millennium Iron Range, located in the Province of Newfoundland and Labrador and in the Province of Quebec, which holds one of the world's largest undeveloped magnetic iron ore deposits. In the same area, the Corporation and Tata Steel Limited, one of the largest steel producers in the world, are advancing a Direct Shipping Ore ("DSO") Project to near term production. Tata Steel Limited owns approximately 26.5% of New Millennium and is the Corporation's largest shareholder and strategic partner.

Tata Steel exercised its exclusive option to participate in the DSO Project and has a commitment to take the resulting production (see news release 10-16 dated September 14, 2010). The DSO Project is owned and operated by TSMC, which in turn is 80% owned by Tata Steel and 20% owned by NML. The DSO project contains 64.1 million tonnes of Proven and Probable Mineral Reserves at an average grade of 58.8% Fe, 21.0 million tonnes of Measured and Indicated Mineral Resources at an average grade of 59.2% Fe, 10.3 million tonnes of Inferred Resources at an average grade of 58.3% Fe and about 25.0 - 30.0 million tonnes of historical resources that are not currently in compliance with NI 43-101 (see news release 09-03 dated February 11, 2009, news release 09-05 dated March 4, 2009, news release 09-16 dated December 9, 2009, news release 10-12 dated July 8, 2010 and news release 12-14, dated May 31, 2012). A qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves, the Corporation is not treating the historical estimate as current mineral resources or mineral reserves and the historical estimate should not be relied upon.

The Millennium Iron Range currently hosts two advanced projects: LabMag contains 3.5 billion tonnes of Proven and Probable reserves at a grade of 29.6% Fe plus 1.0 billion tonnes of Measured and Indicated resources at an average grade of 29.5% Fe and 1.2 billion tonnes of Inferred resources at an average grade

of 29.3% Fe (see news release 06-13 dated July 5, 2006 and news release 07-11 dated July 17, 2007); KéMag contains 2.1 billion tonnes of Proven and Probable reserves at an average grade of 31.3% Fe, 0.3 billion tonnes of Measured and Indicated resources at an average grade of 31.3 % Fe and 1.0 billion tonnes of Inferred resources at an average grade of 31.2% Fe (see news release 09-01 dated January 16, 2009). Tata Steel also exercised its exclusive right to negotiate and settle a proposed transaction in respect of the LabMag Project and the KéMag Project (see news release 11-09 dated March 6, 2011).

The Millennium Iron Range now hosts another taconite deposit, Lac Ritchie located at its north end. The initial 2011 drilling of 40 holes in this property revealed Indicated Resources of 3.330 billion tonnes at an average grade of 30.3% Fe and 1.437 billion tonnes of Inferred Resources at 30.9% Fe (see news release NR 12-11, dated April 02, 2012).

The Corporation's mission is to add shareholder value through the responsible and expeditious development of the Millennium Iron Range and other mineral projects to create a new large source of raw materials for the world's iron and steel industries.

Forward-Looking Statements

This document may contain "forward-looking statements" within the meaning of Canadian securities legislation and the United States Private Securities Litigation Reform Act of 1995. These forward-looking statements are made as of the date of this document and the Corporation does not intend, and does not assume any obligation, to update these forward-looking statements.

Forward-looking statements relate to future events or future performance and reflect management of the Corporation's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative of these terms or comparable terminology.

By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Corporation to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of resources; possible variations in ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Corporation's interim and annual financial statements and management's discussion and analysis of those statements, all of which are filed and available for review on SEDAR at www.sedar.com. Although the Corporation has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward looking statements.
