New York, United States (ABN Newswire) - FINANCE VIDEO: CEO of [McEwen Mining Inc](#), Rob McEwen presented to Manhattan investors on October 11th 2012.

Addressing a gathering of institutional and high net worth investors, Rob McEwen, whose former company GoldCorp discovered the World's richest Gold deposit, explained the strategy of McEwen Mining with their current projects in Nevada, Mexico and Argentina.

With a history as the most successful Gold miner in the United States, and possibly the world, Rob McEwen confidently explained to investors the value of investing in Gold rather than currency. In a short period of only 10 years, investors who would have held currency rather than Gold will have seen a loss of purchasing power of over 80% based on the US dollar.

'Today Gold has the lowest opportunity cost in the last 50 years' said Mr McEwen, encouraging investors to look at the statistical performance of Gold, further stating that he believed that Gold will reach US\$5000 an ounce in the current cycle.

Mr McEwen announced a 'Rights Issue' that will provide capital for the company to quickly progress initiatives to drive the company to expand its potential, and projecting the company will triple Gold production by 2015.

McEwen Mining Inc., is a high growth, low cost mid-tier gold producer in the Americas. Rob McEwen, Chairman & CEO, owns 25% of the outstanding shares. The Company's driving ambition is to qualify for the inclusion in the S&P 500 by 2015.
