Fineness of gold produced during the twelve week period remained steady at 960 fine (96% fine gold).

Production output and cost performance has continued to improve through the period, with weekly production for September rising to 68.95 tr oz per week (excluding planned maintenance downtime), and cash operating costs fell to US \$356.92 per tr ounce as a result of better grade and increased operating availability.

We are very pleased that our elluvial/alluvial production operation from a single production unit is continuing to improve, and is now producing gold at very competitive costs, and delivering consistent operating results. We look forward to further increasing output in the near future.
