

Long-Term Demand for Uranium on the Rise as China and India Continue to Move Forward With Nuclear Expansion Plans

29.11.2012 | [Marketwired](#)

Five Star Equities Provides Stock Research on USEC and Uranium One

NEW YORK, NY -- (Marketwire) -- 11/29/12 -- Before the Fukushima disaster, the demand for nuclear power was rapidly growing as China and India had plans to construct over 50 nuclear reactors over the next five years. After pausing those plans in 2011 the countries have just recently began moving forward with their nuclear expansion plans. Five Star Equities examines the outlook for companies in the Uranium Industry and provides equity research on [USEC Inc.](#) (NYSE: USU) and [Uranium One, Inc.](#) (TSX: UUU).

China has recently lifted its ban on building new nuclear power stations in coastal areas. China plans to increase its nuclear capacity from 12 million kilowatts to 40 million kilowatts by 2015. The country hopes to meet at least half of their projected uranium demand through domestic production, and the other half through foreign imports.

In attempts to meet its rapidly growing demand for energy, India has recently secured a deal with Canada which would allow Canadian companies to export uranium to India. India has plans to generate 25 percent of its electricity from nuclear energy by 2050.

Five Star Equities releases regular market updates on the Uranium Industry so investors can stay ahead of the crowd and make the best investment decisions to maximize their returns. Take a few minutes to register with us free at www.FiveStarEquities.com and get exclusive access to our numerous stock reports and industry newsletters.

USEC is a leading supplier of enriched uranium fuel and nuclear industry related services for commercial nuclear power plants. Since 2002, USEC has been developing and demonstrating a highly efficient uranium enrichment gas centrifuge technology called the American Centrifuge. USEC is working to deploy this technology in its American Centrifuge Plant.

Uranium One is a Canadian-based company and one of the world's largest publicly traded uranium producers with a globally diverse portfolio of assets located in Kazakhstan, the United States and Australia. The company reported production in the third quarter of 2012 surged 23 percent to 3.1 million pounds.

Five Star Equities provides Market Research focused on equities that offer growth opportunities, value, and strong potential return. We strive to provide the most up-to-date market activities. We constantly create research reports and newsletters for our members. Five Star Equities has not been compensated by any of the above-mentioned companies.
