

# TG World Energy Corp. Provides Tindalo Operations Update

29.12.2010 | [Marketwired](#)

CALGARY, ALBERTA -- (Marketwire - Dec. 29, 2010) - [TG World Energy Corp.](#) (TSX VENTURE:TGE) ("TG World" or the "Company") announces that project partner and operator of Service Contract 54A ("SC 54A") in the Philippines, Nido Petroleum Ltd. ("Nido"), has provided the following update on the Tindalo-1 sidetrack ("Tindalo-1ST1").

"Since the last operations update on 22 December 2010, subsequent water analyses from Zones 1, 2 and 3 indicated that produced water was formation water. In addition, increasing water-cuts and declining oil production rates during the period of the test indicates that continued production from Tindalo would be uneconomic and the decision has therefore been taken by the Joint Venture to abandon the well. The abandonment program will shortly be underway and will be completed in January 2011.

Whilst abandonment activities on Tindalo are underway, Nido, along with its Joint Venture partners will decide whether to demobilise the production equipment and hardware from SC 54A, or to retain the equipment for further work within the permit."
