

Great Bear Resources Ltd. Terminates Etzel Option

10.10.2012 | [The Newswire](#)

October 10, 2012 - [Great Bear Resources Ltd.](#) (TSX-V: GBR, OTCQX: GTBDF, "Great Bear", or the "Company") announces receipt of drill results from the Etzel project, Yukon. Results do not support further work on the project, and the Company has terminated its option agreement with Ansell Capital Corp. (TSX-V:ACP.V - News).

Drilling by Great Bear across the on-strike projection of the Klaza and BYG zones of Rockhaven Resources' (TSX-V:RK.V - News) Klaza property onto the Etzel property has not encountered economically significant gold mineralization. Results are summarized in the table below. While a gold-mineralized structural system was intersected in all drill holes, grades and thicknesses of mineralization do not support further work.

The Company has more than \$1.5M on hand and is reviewing new opportunities.

Drill Hole	From (m)	To (m)	Length (m)	Gold (g/t)	Silver (g/t)	Copper (%)
ET-2012-004	82.59	108.52	25.94	0.16	0.6	0.006

Table 1: Results of summer 2012 drilling at the Etzel project.

Drill core assay results are evaluated through a Quality Assurance and Quality Control (QAQC) procedure that includes the use of standards with known precious and base metal values, duplicated core intervals and blank samples in order to determine accuracy. Assaying was carried out by Acme Labs of Vancouver, British Columbia.
