

# Uranium Industry Looks to Benefit as Japan Appears Ready to Embrace Nuclear Power Once Again

18.02.2013 | [Marketwired](#)

## RDInvesting Provides Stock Research on Denison Mines and Uranium Energy

NEW YORK, NY -- (Marketwire) -- 02/18/13 -- The Fukushima disaster in Japan dealt a major blow to the Uranium Industry as many countries began to abort nuclear plans shortly after the incident, sending prices for uranium plummeting by as much as 40 percent. Two years after the disaster Japan finally looks ready to embrace nuclear power once again. The Global X Uranium ETF (URA) has rallied over 7 percent year-to-date. Research Driven Investing examines investing opportunities in the Uranium Industry and provides equity research on [Denison Mines Corp.](#) (NYSE: DNN)(TSX: DML) and [Uranium Energy Corp.](#) (NYSE: UEC).

A revival in Japanese demand could provide a major boost for struggling uranium prices. Before the incident Japan's annual uranium demand was approximately 20 million pounds, but have since fallen sharply as only 2 of its 50 nuclear reactors are online. Global demand for uranium is currently about 177 million pounds, according to Cantor Fitzgerald analyst, Rob Chang,

"There's a huge push for the restarts from industry, big electricity users, government and the utilities themselves," said David Sadowski, a Raymond James analyst. "And if you look at recent polls, even people in the towns around the nuclear plants, the ones who would be affected the most, are actually supportive of bringing them back online."

Research Driven Investing releases regular market updates on the Uranium Industry so investors can stay ahead of the crowd and make the best investment decisions to maximize their returns.
