

International Silver, Inc. Announces General Manager of Montana Operations

13.03.2013 | [Marketwired](#)

TUCSON, 03/13/13 - [International Silver Inc.](#) (OTCQB: ISLV) is pleased to announce that Mr. Robin McCulloch has joined the company as General Manager of its Montana Operations. He will be based out of our newly established company offices at 101 N. Main Street, Butte, Montana 59701.

Robin McCulloch, a senior mining engineer with the Montana Bureau of Mines and Geology in Butte, Montana for the past 25 years, assisted the mining industry with permitting, exploration, mine design, engineering and mine geology. Although his main focus was on small to medium sized operations, Robin McCulloch worked directly with all of the mining industry through the Montana Mining Association where he has been a member of the board of directors for most of his career.

The Butte properties host the majority of the silver mines operated by the Anaconda Corporation ("Anaconda") in the Butte Mining District from the late 1800s until the 1970s when Anaconda ceased operations. They include numerous ore bodies with significant remaining silver/zinc/copper/lead mineralization and a number of developed underground mines, including surface facilities, serviceable head frames for hoisting and power installations.

Mr. Shipes, the President and CEO of International Silver, Inc. commented: "We are very fortunate to have added Robin to spearhead the company's Butte development plans; he has a tremendous wealth of experience and industry knowledge."

About International Silver Inc.

International Silver, Inc. (the "Company"), headquartered in Tucson, Arizona, is an exploration and mine development company with properties in Nevada, Montana and California. An emerging silver company, International Silver's common shares are traded on the OTCQB under the symbol ISLV.

Statements made which are not historical facts, such as anticipated payments or purchases are "forward-looking statements" and involve a number of risks and uncertainties that could cause actual results to differ materially from those projected, anticipated, expected or implied. These risks and uncertainties include, but are not limited to, metals price volatility, volatility of metals production and costs, exploration risks and results, political risks, project development risks, labor issues and ability to raise financing. The information contained in this press release should not be construed as any indication whatsoever of the Company's future revenues or financial condition or the future price of its common stock. Refer to the Company's Form 8-K, Form 10-Q and 10-K reports for a more detailed discussion of factors that may impact expected future results. The Company undertakes no obligation and has no intention of updating forward-looking statements.
