

Long-Term Demand for Uranium to Be Driven by Emerging Nation - Miners Could Receive Boost From End of Russia's Disarmament Treaty

18.03.2013 | [Marketwired](#)

Five Star Equities Provides Stock Research on Uranium Energy and Uranium Resources

NEW YORK, NY -- (Marketwire) -- 03/18/13 -- The Uranium Industry has continues to face an uphill climb since the Fukushima disaster shut down all but 2 of the 50 reactors in Japan. Prices for the commodity have fallen roughly 70 percent since its peak in 2007, while a majority of minerals have experienced price increases. Five Star Equities examines the outlook for companies in the Uranium Industry and provides equity research on [Uranium Energy Corp.](#) (NYSE: UEC) and [Uranium Resources, Inc.](#) (NASDAQ: URRE).

Across the globe they are approximately 500 nuclear reactors that are either planned or under construction, which is more than double the number of reactors currently in use. Uranium miners could soon receive a boost from the end of Russia's 1993 disarmament treaty that requires them to unload uranium from discarded nuclear weapons. Russia is responsible for as much as 24 million pounds of uranium exports a year, according to the terms of the treaty. The treaty is set to expire at the end of 2013.

"The long-term fundamentals are there based on demand increasing from China and emerging nations, along with extensions for reactors in the U.S., and dwindling cheap uranium," says Philip Johnson, a director at Ux Consulting Co.

Five Star Equities releases regular market updates on the Uranium Industry so investors can stay ahead of the crowd and make the best investment decisions to maximize their returns.
