Rokmaster Resources Corp. Applies for 1,000 Hectare Mining Concession

05.04.2013 | Marketwired

VANCOUVER, BRITISH COLUMBIA -- (Marketwired - April 5, 2013) - Rokmaster Resources Corp. (TSX VENTURE:RKR) ("Rokmaster" or the "Company") is pleased to announce that its wholly owned Peruvian subsidiary, Minera Pinaya Peru S.A., has applied for a 1,000 hectare mining concession adjoining the north eastern portion of its Pinaya Project concession block. The new mining concession area is also bounded on the south and west by BHP Billiton World Exploration Inc., and on the northwest by Golden Ideal Gold Mining S.A.C.. This new concession is on the favorable northwest trend of the well mineralized belt leading to Xstrata's nearby Tintaya and Antapaccay porphyry deposits and will increase the total land package of the Pinaya Project to 20,200 hectares.

ABOUT ROKMASTER

Rokmaster is a mineral exploration and development company working in North and South America. The Company has assembled certain mineral exploration projects including the Pinaya copper gold project in southern Peru. While these properties are largely at early stages of development they represent exiting opportunities for the discovery of significant precious and base metal mineralization as evidenced at Pinaya (Gold Oxide Zone: Measured + Indicated ("M+I") mineral resources of 6,401,000 tonnes @ 0.79g/t Au and Inferred ("Inf") of 2,383,000 tonnes @ 0.59g/t Au and in the NW and West Porphyry Zone; M+I : 32,269,000 tonnes @ 0.43g/t Au + 0.39% Cu and Inf : 35,412,000 tonnes @ 0.27g/t Au + 0.40% Cu.*). Rokmaster's business model is to utilize its highly experienced team of mineral explorationists and developers to discover significant mineral resources and aggressively advance such projects, and to expose its shareholders to significant capital gain in the near term.

*(The mineral resource estimates are disclosed by Rokmaster at www.sedar.com or www.rokmaster.com in a National Instrument 43-101 Report dated July 26, 2012 titled "Independent Technical Report on the Pinaya Gold/Copper Property, Caylloma and Lampa Provinces, Peru, for Rokmaster Resources Corp. By prescribed definition, "mineral resources" do not have demonstrated economic viability. An Inferred mineral resource is that part of a mineral resource for which quantity and grade can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The mineral resources fall within a volume or shell defined by long-term metal price estimates of US$3.00/lb for copper and US$1,100.00/oz for gold.)

Mark Rebagliati, P.Eng., a Qualified Person as defined under National Instrument 43-101, is supervising the quality assurance and quality control programs and exploration on behalf of Rokmaster and has reviewed the technical content of this release.

On behalf of the Board of Directors of ROKMASTER RESOURCES CORP.

John Mirko
President & Chief Executive Officer

Forward-Looking Information

Information set forth in this news release contains forward-looking information that is based on assumptions as of the date of this news release.
