Concentrates

1,041 ounces of gold were produced during May, comprised of 271 ounces of gold contained in flotation concentrate and 769 ounces of gold in gravity concentrate.

Ore Mining

- Total ore mined during May was 11,368 tons, which is 1,435 more tons than during April. A total of 806 feet of ore was mined in May, 2% less than April.
- The mine performed at an average of 5.2 rounds of mining progress per day.
- The focus of the engineering and geology departments continues to be the improvement and maintenance

of grade and tons via the development of more ore headings, and the on-going drilling and assay work to limit dilution of higher grade ore.

Development

- This month saw further progress made towards the strategic ore reserves in the C zone targeted for third and fourth quarter mining.
- During May development footage increased by 41% to 703 feet(1) from April's figures.

Ore Processing

- The milled tons increased from 10,393 tons in April to 10,843 tons in May.
- The grade also improved from 0.0969 ounces of gold per ton in April to 0.1073 ounces per ton in May.
- Mill recovery during May averaged 89% which is 8% more than April.
