

Darwin Commences Diamond Drilling at Suriloma Gold Project Peru

19.06.2013 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA -- (Marketwired) -- 06/19/13 -- [Darwin Resources Corp.](#) ("Darwin" or "The Company") (TSX VENTURE: DAR) (PINKSHEETS: DARWF) (FRANKFURT: DWU): Dr. Graham Carman, President & CEO, is pleased to announce that the Company has commenced its initial drilling program at the Suriloma epithermal gold project, Department of La Libertad, Peru. Darwin has planned a 12-hole, 2,000 metre diamond drill program to test outcropping oxide gold mineralization at the La Puerta target area. Drill holes will test beneath the surface oxide mineralization to a depth of approximately 150 metres.

The drill program has started with one drilling rig currently operating. A second drill rig will be mobilized to site within the next week to speed up the drilling process and maximise cost efficiencies. The entire drill program is expected to take approximately 8 weeks. Results for the first holes should be available by the end of July, and all results published by September.

The Suriloma project is located in a prolific gold belt in Peru, 30km along strike from Barrick's Lagunas Norte mine and 50km from Rio Alto's La Arena mine. Darwin previously reported very encouraging channel sampling results from the La Puerta area (see news release December 14, 2012, and January 10, 2013) from outcropping oxide mineralization. Darwin's channel sampling highlighted a quartz stockwork zone covering 1,300 metres open-ended and up to 100m wide within two sub-parallel zones. Channel sampling included 16 metres @ 2.12 grams per tonne (g/t) gold from Zone A, and 29 metres @ 1.60 g/t gold from Zone B.

The qualified person, Dr Graham Carman, Darwin's President and CEO, and a Fellow of the Australasian Institute of Mining and Metallurgy, has reviewed and verified the technical contents of this release.

About Darwin Resources Corp:

[Darwin](#) (TSX VENTURE: DAR) (PINKSHEETS: DARWF) (FRANKFURT: DWU) is a resource acquisition and development company focussing on Peru. The Company has an option to acquire 100% of the Suriloma epithermal gold property in the Department of La Libertad.

On behalf of the Board,

Dr Graham Carman
President & CEO

Forward Looking Statements - This Company News Release contains certain "forward-looking" statements and information relating to the Company that are based on the beliefs of the Company's management as well as assumptions made by and information currently available to the Company's management. Such statements reflect the current risks, uncertainties and assumptions related to certain factors including, without limitations, failure to successfully complete intended financings, capital and other costs varying significantly from estimates, production rates varying from estimates, changes in world metal markets, changes in equity markets, uncertainties relating to the availability and costs of financing needed in the future, equipment failure, unexpected geological conditions, imprecision in resource estimates or metal recoveries, success of future development initiatives, competition, operating performance, environmental and safety risks, delays in obtaining or failure to obtain necessary permits and approvals from local authorities, and other development and operating risks. Should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described herein. Although Darwin believes that assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

Neither the TSX Venture Exchange, its Regulation Services Provider (as that term is defined in the policies

of the TSX Venture Exchange), nor the Frankfurt Stock Exchange accepts responsibility for the adequacy or accuracy of this news release.
