Abcourt Mines Inc.: Restoration Plan for Elder Gold Mine Approved and New Resources Found at West End of Mine Below 8th Level

15.07.2013 | Marketwired

MONT-ST-HILAIRE, QUEBEC--(Marketwired - Jul 15, 2013) - **Mr. Renaud Hinse, President and C.E.O. of Abcourt Mines Inc. (TSX VENTURE:ABI)(BERLIN:AML)(FRANKFURT:AML)** (the "**Company**"), is pleased to announce that the restoration plan for the Elder gold mine has been approved by the *"Ministère des Ressources naturelles du Québec"* as presented by Abcourt. This is the last permit needed to bring the Elder gold mine in production.

Mr. Renaud Hinse is also pleased to announce that hole E13-78, recently drilled vertically at the west end of the mine, has found an extension of vein No.1 at depth, below the 8th level, and a new vein, 14 meters above vein No.1. The assay results are as follows:

FROM	TO	LENGTH METERS	GOLD g/tonne	VEIN
314.10	315.30	1.2	8.06	New vein
329.29	332.29	3.0	6.41	Vein No.1

These intersections are very significant. In addition to indicating new resources with depth potential, it gives a target for an exploration drift on the 8th level that we are planning to start in 2 or 3 weeks. The new resources are located about 100 meters west of an existing drift on the 8th level.

About Abcourt Mines Inc.

Abcourt Mines Inc. is an exploration and development company with strategically located properties in northwestern Quebec, Canada. The Elder Mine with 43-101 gold resources, the Abcourt-Barvue Project with 43-101 silver-zinc ore reserves and resources and the Aldermac property with historical copper-zinc resources are all former producers. Abcourt is now focused on bringing the Elder and Abcourt-Barvue projects back into production with Elder as the first priority. At the same time the company is working on other projects (Aldermac, Vezza, Jonpol and Vendome) to increase its mineral resources inventory. A 43-101 resource calculation was completed in July, 2012, for the Elder Mine. A positive PEA report was prepared on Elder mine in the Fall of 2012 by Roche Limited, Consulting Group. A positive 43-101 feasibility study was completed by GENIVAR in 2007 on the Abcourt-Barvue Project. In addition, mill equipment was purchased. FORWARD-LOOKING STATEMENTS: *Certain of the information contained in this news release may contain "forward-looking information". Forward-looking information and statements may include, among others, statements regarding the future plans, costs, objectives or performance of Abcourt Mines Inc. (the "**Company**"), or the assumptions underlying any of the foregoing. In this news release, words such as "may", "would", "could", "will", "likely", "believe", "expect", "anticipate", "intend", "plan", "estimate" and similar words and the negative form thereof are used to identify forward-looking statements. Forward-looking statements should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether, or the times at or by which, such future performance will be achieved. Forward-looking statements and information are based on information available at the time and/or management's good-faith belief with respect to future events and are subject to known or unknown risks, uncertainties, assumptions and other unpredictable factors, many of which are beyond the Company's control. These risks, uncertainties and assumptions include, but are not limited to, those described under "Risk Factors" in the Company's amended and restated annual information form dated November 26, 2010 and could cause actual events or results to differ materially from those projected in any forward-looking statements. The Company does not intend, nor does the Company undertake any obligation, to update or revise any forward-looking information or statements contained in this news release to reflect subsequent information, events or circumstances or otherwise, except if required by applicable laws.*

This press release was prepared by Mr. Renaud Hinse, a qualified person, President of Abcourt Mines Inc.
