

# Handeni Gold Inc. Update on Exploration Program-The Mjembe Target

16.07.2013 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Jul 16, 2013) - [Handeni Gold Inc.](#) (the "Company" or "Handeni Gold") (OTCQB:HNDI) is pleased to provide an update on the exploration activities conducted on its exploration licenses in the United Republic of Tanzania.

An extensive soil sampling program and ground magnetic survey on the Mjembe target (Fig. 1) has been completed. Mjembe is located on PL6744/2010 and is a known artisanal mining site. The selected survey and sample area consisted of an approximately 23 km<sup>2</sup> block. A total of 5068 soil samples have been analysed for a suite of major and trace elements by desk top Energy dispersive XRF. The aim of the exercise was to delineate narrower target areas, to define a usable element suite indicative of gold mineralization that would reduce the number of samples submitted for Au assays, to evaluate the correlation (if any) between various geophysical parameters and geochemistry and to define targets within the 23km<sup>2</sup> block that may develop into drill targets. The results are highly encouraging.

An EM (electromagnetic) anomaly of approximately 5,5 km (NNE strike distance) is particularly well defined and corroborated by enriched Fe and a depletion in Sr as determined in soil samples. Anomalously enriched As, Cu, Co and Zn values also coincide with the geophysical anomaly (Fig. 2). The artisanal gold activity is on the north western fringe of the electromagnetic and geochemical anomaly. Ground magnetic data outlines a superimposed NW-SE structural trend seemingly coinciding with the geochemical anomalies and artisanal mining sites. Preliminary interpretation suggest that the Mjembe anomalous area represents a target within a plunging sheath fold on a scale of 10 km by 3.5 km. The geophysics indicates the continuation of this structure in depth to the east of the surface geochemical anomaly. Exploration on each of the anomalies within this structure will now focus on more detailed ground geophysics and mapping to be able to prepare drill targets within the larger Mjembe target area.

HNDI is also currently finalizing data interpretation on Target 6 (Fig. 1) which has been explored following the same procedures as for the Mjembe anomaly.

*Says Dr. Scheepers, CEO of [Handeni Gold Inc.](#), "These results are auspicious and the Mjembe anomaly will undoubtedly develop into HNDI's 4<sup>th</sup> drill target." He continued, "The priority ranking will be decided upon when data have been compared to the Magambazi East target, the Kwandege project, Target 5 and other anomalies currently being explored."*

## About Handeni Gold Inc.

The Company is an emerging mineral exploration company focused on exploring and developing mining opportunities in Tanzania. For more information, go to [www.handenigoldltd.com](http://www.handenigoldltd.com).

## Safe Harbour Statements

Except for the statements of historical fact contained herein, the information presented in this news release constitutes "forward-looking statements" as such term is used in applicable United States and Canadian laws. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections,

objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and should be viewed as "forward-looking statements". Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks and other factors include, among others, the actual results of exploration activities, the availability of capital to fund programs and the resulting dilution caused by the raising of capital through the sale of shares, accidents, labour disputes and other risks of the mining industry including, without limitation, those associated with the environment, delays in obtaining governmental approvals, permits or financing or in the completion of development or construction activities, title disputes or claims limitations on insurance coverage. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended.

There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements contained in this news release and in any document referred to in this news release.

Forward looking statements are made based on management's beliefs, estimates and opinions on the date the statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by applicable law. Such forward-looking statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions, including, the risks and uncertainties outlined in our most recent financial statements and reports and registration statement filed with the United States Securities and Exchange Commission (the "SEC") (available at [www.sec.gov](http://www.sec.gov)) and with Canadian securities administrators (available at [www.sedar.com](http://www.sedar.com)). Such risks and uncertainties may include, but are not limited to, the risks and uncertainties set forth in the Company's filings with the SEC, such as the ability to obtain additional financing, the effect of economic and business conditions, the ability to attract and retain skilled personnel and factors outside the control of the Company. These forward-looking statements are made as of the date of this news release, and the Company assumes no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements, except as required by applicable law. Although the Company believes that the beliefs, plans, expectations and intentions contained in this news release are reasonable, there can be no assurance those beliefs, plans, expectations or intentions will prove to be accurate. Investors should consider all of the information set forth herein and should also refer to the risk factors disclosed in the Company's periodic reports filed from time-to-time with the SEC. This news release shall not constitute an offer to sell or the solicitation of an offer to buy securities of the Company nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.
