

# Tower Resources Makes Strategic Acquisition of Rabbit North Copper & Gold Porphyry Project

18.07.2013 | [The Newswire](#)

(via [Thenewswire.ca](#))

Vancouver, B.C. - [Tower Resources Ltd.](#), (TSX.V: TWR) announces the signing of an agreement to acquire the Rabbit North Copper (Cu) - Gold (Au) Property located in the Kamloops mining division of south central British Columbia. Under the terms of the agreement, Tower may acquire a 100% interest in the property subject to a 3% NSR.

The Rabbit North property comprises 2850 hectares located in the active and significant Kamloops mining division. The road accessible property is approximately 14.5 kilometres west of the producing New Afton mine operated by New Gold Inc. (Measured and Indicated Mineral Resources of 51.8 million tonnes at 1.26% Cu, 0.91 grams per tonne (g/t) Au, 2.9 g/t silver and .11 g/t palladium at 0.5% Cu cutoff) and approximately 28 kilometres east northeast of the producing Highland Valley mine operated by [Teck Resources Ltd.](#), Canada's largest copper producer.

Alkalic porphyry related mineralization and alteration at the Rabbit North property is documented in two host rock types; the three by two kilometer Late Triassic to Early Jurassic zoned alkaline intrusion termed the Durand Stock, and the intrusion's volcanic country rocks assigned to the Upper Triassic Nicola Group. The age of the Durand Stock is approximately the same age as the Guichon and Iron Mask batholiths, which host the Highland Valley and New Afton mines respectively. Copper mineralization within the porphyritic monzonite core of the Durand Stock is characterized by disseminated and blebby chalcopyrite whereas mineralization hosted in the Nicola volcanics is dominantly characterized by disseminated and blebby chalcopyrite and pyrite (+/- bornite) associated with varying degrees of albite, biotite and magnetite alteration.

Historical exploration on the property was completed by major companies such as Kennco, Noranda and Cominco in the 1960s and 1970s and by junior companies such as ProAm Exploration and Auterra Ventures in the late 1990s and early 2000s. These programs consisted of shallow diamond drilling in a confined area, percussion drilling, soil and organic geochemistry and various geophysical programs. Collectively, the historical work outlines numerous porphyry related targets that Tower intends to investigate in detail during the 2013 field season. .

Under the terms of the option agreement dated July 11, 2013, subject to TSX Venture Exchange acceptance, Tower can earn a 100% interest in the property by making cash payments of \$170,000 and issuing one million common shares over a 4-year period, to the vendors, in addition to funding aggregate exploration expenditures of \$2,000,000 over a 5-year period. The agreement is subject to 3% NSR, 2% of which can be purchased by Tower for \$3,500,000.

### **Forward-Looking Statement Caution**

This news release contains certain "forward-looking statements", as defined in the United States Private Securities Litigation Reform Act of 1995, and within the meaning of Canadian securities legislation. The Company cautions that forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made and they involve a number of risks and uncertainties. Consequently, there can be no assurances that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update these forward-looking statements if management's beliefs, estimates or opinions, or other factors, should change, except as required by law. There are numerous risks and uncertainties that could cause actual results and Tower's plans and objectives to differ materially from those expressed in the forward-looking information. The reader is urged to refer to the Company's public disclosure which is available through the Canadian Securities Administrators' System for Electronic Document Analysis and Retrieval (SEDAR) at [www.sedar.com](http://www.sedar.com) for a more complete discussion of such risk factors and their potential effects.
