

Africa Hydrocarbons Prepares for Test of BHN-1 Well in Tunisia

23.07.2013 | [Marketwired](#)

CALGARY, ALBERTA--(Marketwired - Jul 23, 2013) - [Africa Hydrocarbons Inc.](#) (TSX VENTURE:NFK) ("AHI"

or the "Company") is pleased to announce that production tubing is being installed at the Company's BHN-1 well on the Bouhajla Permit in northeastern Tunisia. Following the evaluation of cased-hole logs the decision was made to configure the wellbore for testing purposes. Several interpreted fracture intervals are observed within a 245m thick Abiod section. Elevated C1-C4 gas chromatograph readings along with evidence of micro-fractures observed in drill cuttings coincide with the potential fracture intervals.

The operator of the well plans to release the drilling rig once the tubing has been set and return with wireline perforating guns and a coiled tubing unit to perforate and acidize the selected test intervals as soon as possible.

The BHN-1 well was spud on June 8, 2013 and is the first exploration well on the Bouhajla Permit. It is being drilled to evaluate a Cretaceous Abiod oil target on the Bouhajla North prospect.

About the Company

AHI is a Canadian based international oil and natural gas company involved in the acquisition, exploration and development of energy assets, with an emphasis on Africa. The key asset of the Company is its 47.5% owned Bouhajla Block, located onshore in Tunisia within the productive Pelagian Basin.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this News Release.

ON BEHALF OF THE BOARD OF

Africa Hydrocarbons Inc.

John Nelson, CEO

Forward-Looking Statements

This news release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "project", "should", "schedule", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this news release contains forward looking statements and information concerning the Company's future operations. The forward-looking statements and information are based on certain key expectations and assumptions made by the Company, including expectations and assumptions concerning equipment and crew availability and joint venture partner financial capability. Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward looking statements and information because the Company can give no assurance that they will prove to be correct. By its nature, such forward-looking information is subject to various risks and uncertainties, which could cause the Company's actual results and experience to differ materially from the anticipated results or expectations expressed. These risks and uncertainties include, but are not limited to, reservoir performance, labour, equipment and material costs, access to capital markets, interest and currency exchange rates, and political and economic conditions. Additional information on these and other factors is available in continuous disclosure materials filed by the Company with Canadian securities regulators. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date it is expressed in this news release or otherwise, and to not use future-oriented information or financial outlooks for anything other than their intended purpose. The Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.
