THIS NEWS RELEASE IS NOT FOR DISSEMINATION OR DISTRIBUTION IN THE UNITED STATES OF AMERICA TO UNITED STATES NEWSWIRE SERVICES

MELBOURNE, AUSTRALIA -- (Marketwired - Aug. 2, 2013) - [Inova Resources Limited](#) (TSX:IVA) (ASX:IVA) is in the process of preparing its financial statements for the half-year ending 30 June 2013 and its internal forward plans and outlook (forecasts). The company's financial statements for the half-year ending 30 June 2013 are expected to be released in mid-August, 2013.

The forecasts will be approved prior to the completion of the half-year accounts and, once approved, will be used to finalise the assessment of the carrying value of the Company's assets. A number of factors are used to determine carrying values, including future commodity price and exchange rate assumptions, life of mine plans and operating and capital cost estimates.

While the work to finalise the forecast is not yet complete, it is likely that the carrying value of the Osborne Copper-Gold business assets will be impaired between A\$40 million and A\$45 million. This impairment comes as a result of significantly reduced copper and gold price assumptions following the recent deterioration in commodity prices and changes to operating assumptions.

It should be noted that although the impairment will affect the reported accounting profit/loss of the Company, there is no impact on cashflows or cash balances.
