

Bulk Sample Yields Recoveries of 60% Gold at Terra Project in Alaska

18.12.2012 | [Business Wire](#)

DENVER -- (BUSINESS WIRE) -- [WestMountain Gold, Inc.](#) ("WestMountain") (WMTN), a mineral exploration and development company, today announced metallurgical results from its initial production scale bulk sample test milling at the Terra Project (Table 1). The results are from a 23-ton surface bulk sample of the Ben and Fish Creek veins (Figure 1). A total of 75 ounces of gold and 28 ounces of silver were produced using the Company's new onsite milling and gravity recovery system, yielding recoveries of 60% for gold and 15% for silver (Figure 1). These recovery numbers compare favorably to prior bench scale gravity recovery test work (the plant has yet to be optimized for silver recovery). The dore bars will be sent to Johnson Matthey refining in Salt Lake City, Utah, for final reduction to saleable gold and silver. The Company will focus on a larger bulk sample next summer, utilizing the full plant capacity of approximately 40-50 tonnes per day.

Table 1

WestMountain analytical results from initial concentrate melt:

Dore Composite Sample	68.683% Au	25.9% Ag
-----------------------	------------	----------

WestMountain is evaluating the gravity recovery circuit and will be upgrading the gravity circuit for the 2013 field season. Head grades for the 23 tons of vein material processed by the Terra mill was approximately 5.5 oz/t Au and 10 oz/t Ag.

Greg Schiffrin, WestMountain CEO, stated, "We are extremely pleased with the initiation of gold production from our pilot plant at the Terra Project and we will continue with focused development on the project to maximize value for our shareholders."

About WestMountain Gold, Inc.

[WestMountain Gold, Inc.](#) (WMTN) is an exploration and development company that explores, acquires, and develops advanced stage properties. The Company has a high-grade gold system in the resource definition phase with 168,000 ounces of inferred gold, which in total offers potential of greater than 1,000,000 ounces that is owned by the Company's wholly owned subsidiary, Terra Gold Corporation ("TGC"). The WestMountain property consists of 344 Alaska state mining claims covering 223 square kilometers. All government permits and reclamation plans for continued exploration through 2014 were renewed in 2010.

TGC is a joint venture partner of Corvus Gold, Inc. ("Corvus") on this project. TGC has the right to earn a 51% interest in the Terra Project from Corvus by spending a total of USD \$6.0 million by December 31, 2013. TGC can further increase its ownership to 80% with an additional USD \$3.05 million investment, bringing to a total of USD \$9.05 million capital investment by December 31, 2014.
