

# SLAM Digging for Gold at Menneval

17.09.2013 | [Marketwired](#)

## Cost Effective Program To Define Potential Near-Surface Gold Resource

MIRAMICHI, NEW BRUNSWICK--(Marketwired - Sep 17, 2013) - [SLAM Exploration Ltd. \(TSX VENTURE:SXL\) \(OTCBB:SLMF\) \("SLAM"\)](#) is pleased to announce a trenching program is in progress at its wholly owned Menneval gold project in New Brunswick. This follows a successful trenching and drilling program which extended the Maisie zone over a strike length of 700 m and to a vertical depth of 30 m after its discovery by SLAM in 2012. Trenching uncovered a mother lode type of vein with grades ranging from 0.14 g/t over 1.4 m up to 1100 g/ tonne gold over 1.1 m in one bonanza shoot (SXL news release October 22, 2012). Diamond drilling shows a similar pattern at depth with core intervals ranging from 0.60 g/t over 8.31 m and up to 121 g/t gold over 0.31 m as announced March 19, 2013.

The purpose of this program is to define the grade and scope of the Maisie vein at surface and to test for potential extensions. The Company also intends to extract bulk samples for additional laboratory and mill testing. Grade/tonnage definition and metallurgical test results are required in preparation for a mining lease application.

**Qualifying Statements:** Mke Taylor, P.Geol. President and CEO of [SLAM Exploration Ltd.](#), is the Qualified Person responsible for the technical information contained herein.

**About The Menneval Project:** SLAM holds 100% interest in 8 contiguous claims that cover 30,820 hectares acquired by map-staking near Menneval in northwest New Brunswick. The property hosts 2 gold deposits, the Maisie gold zone and Zone 9. Click on the SXL website at <http://www.slamresources.com/projects/new-brunswick/menneval> to view maps and exploration results to date. Photos of drill core with visible gold can be viewed at <http://www.slamresources.com/core-shack/>.

### About SLAM Exploration Ltd:

SLAM is a mineral resource company currently focused on development of the bonanza grade Maisie gold zone at its wholly-owned Menneval project in northwestern New Brunswick. The Company owns the Nepisiguit and Nash Creek silver-base metal deposits, both NI 43-101 compliant and located in New Brunswick. The Company also owns a significant gold portfolio in Ontario including the Reserve Creek gold deposit. Additional information about SLAM and its projects is available at [www.slamexploration.com](http://www.slamexploration.com) or from SEDAR filings at [www.sedar.com](http://www.sedar.com). Follow us on twitter @SLAMGold.
