

Romios Announces Completion of A 359 Line Km Helicopter-Borne ZTEM Survey at Newmont Lake in the Golden Triangle, Northwestern British Columbia

18.09.2013 | [Marketwired](#)

TORONTO, ONTARIO--(Marketwired - Sep 18, 2013) - [Romios Gold Resources Inc.](#) (TSX VENTURE:RG)(PINKSHEETS:RMIOF)(FRANKFURT:D4R) is pleased to announce the completion of a helicopter-borne ZTEM electro-magnetic survey conducted by Geotech Ltd. over its Newmont Lake Project Area, located within the world-class Golden Triangle mineral district of northwestern British Columbia.

The survey covers 359 line kilometres of data along east-west lines, spaced at 300 metres over zones where extensive mineralization has been demonstrated. The ZTEM system provides unparalleled depth penetration in precision electromagnetic measurements. The survey was flown over the Northwest Zone, '72 Zone, Telena Zone, Ken Zone and the recently discovered "Burgundy Ridge" Zone containing porphyry-related copper and gold-bearing sulphide mineralization extending over 100 metres in elevation along trend of the "72" and "Telena" Zones. (See News Release, September 4, 2013 with pictures of the mineralization on the Burgundy Ridge on the Company's website, <http://www.romios.com/s/BurgundyPhotos.asp>). The area is interpreted as one of the principle epicentres for porphyry mineralization throughout the entire Newmont Lake Project Area and is an excellent target for future drill campaigns. Assay results from the grab samples, continuous chip and 84 grid samples from the Burgundy Ridge Zone taken in August will be released when they are received and analyzed.

Processing of the digital data and mapping is expected to take approximately another two weeks to complete. Results will be announced as soon as they are received and the technical review is completed by the Company.

About Romios Gold Resources Inc.

[Romios Gold Resources Inc.](#), a progressive Canadian mineral exploration company established in 1995, is headquartered in Toronto and is actively engaged in precious and base metal exploration across North America with a primary focus on gold, silver and copper. Romios has significant property interests in British Columbia, Ontario, Quebec and Nevada. The Company is undertaking extensive exploration work on its Galore Creek area properties in British Columbia, which are centrally located between Galore Creek Mining Corporation's large copper-gold-silver deposit and Barrick's high grade gold mine at Eskay Creek.
