

# Africa Hydrocarbons Provides Operations Update of BHN-1 Well in Tunisia

19.09.2013 | [Marketwired](#)

CALGARY, ALBERTA--(Marketwired - Sep 19, 2013) - [Africa Hydrocarbons Inc.](#) (TSX VENTURE:NFK) ("AHI" or the "Company") today issued the following operational update regarding its BHN-1 exploration well in Tunisia and is pleased to report the drilling rig used to drill the BHN-1 exploration well has now completed moving off the location. The running of an additional cased-hole log has been scheduled to augment log and drill cuttings data already retrieved. This additional log, not available when previous cased-hole logs were acquired, will provide further data to determine the potential hydrocarbon saturation of specific fracture intervals interpreted on well data acquired to date over the 245 meter thick Abiod formation penetrated in BHN-1 and will allow for optimal decision-making with respect to potential test intervals. Once the new log data has been retrieved and interpreted, the decision to continue specific completion operations will be made and perforating and testing equipment moved in, barring any location access issues occurring.

The BHN-1 well was spud on June 8, 2013 and is the first exploration well on the Bouhajla Permit. It is being drilled to evaluate a Cretaceous Abiod oil target on the Bouhajla North prospect.

## About the Company

AHI is a Canadian based international oil and natural gas company involved in the acquisition, exploration and development of energy assets, with an emphasis on Africa. The key asset of the Company is its 47.5% owned Bouhajla Block, located onshore in Tunisia within the productive Pelagian Basin.

## Forward-Looking Statements

*This news release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "project", "should", "schedule", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this news release contains forward looking statements and information concerning the Company's future operations. The forward-looking statements and information are based on certain key expectations and assumptions made by the Company, including expectations and assumptions concerning equipment and crew availability and joint venture partner financial capability. Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward looking statements and information because the Company can give no assurance that they will prove to be correct. By its nature, such forward-looking information is subject to various risks and uncertainties, which could cause the Company's actual results and experience to differ materially from the anticipated results or expectations expressed. These risks and uncertainties include, but are not limited to, reservoir performance, labour, equipment and material costs, access to capital markets, interest and currency exchange rates, and political and economic conditions. Additional information on these and other factors is available in continuous disclosure materials filed by the Company with Canadian securities regulators. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date it is expressed in this news release or otherwise,*

*and to not use future-oriented information or financial outlooks for anything other than their intended purpose. The Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.*
