

# Nortec expands Mineral Rights Holdings of the Seinajoki Gold Project, Finland

28.10.2013 | [The Newswire](#)

Vancouver, British Columbia - October 28, 2013. [Nortec Minerals Corp.](#) ("Nortec" or the "Company") (TSX-V: NVT) is pleased to announce that it has gained access to the prospective Sikakangas gold target which has been the focus of exploration by the Geological Survey of Finland ("GTK") for many years.

It is the area with the highest grade and most consistent gold structures discovered to date in the Seinajoki region. Example of drill intersections by the GTK are:

-21 metres @ 1.25 g/t Au from 4.1 metres, including 3 metres @ 7.17 g/t Au from 17.1 metres (Hole R523)

-5 metres @ 16.72 g/t Au from 3 metres (Hole R476).

Following recent withdrawal by the GTK, the area has been claimed by Akkerman Finland Oy, a 100% subsidiary company of Akkerman Exploration B.V.

Nortec and Akkerman Exploration have agreed to modify their existing Option Agreement, with the inclusion of the new Sikakangas claim (under application) in the existing portfolio of claims and the extension of the third anniversary option payment, which is now due on September the 17th 2014.

Initial work planned on the Sikakangas gold zone, involves resampling and assaying of the unsampled parts of the previous GTK holes, in preparation for the selection of follow-up drill targets aimed at down dip extension of the mineralized structures.

A short program of 5 diamond drillholes holes earlier this year on geochemical anomalies in the Saarikoski and Marttalanniemi Zones has not resulted in significant gold intersections, the best being 0.6g/t over an 8 meter interval. Consequently the next phase of exploration will be focused on the new Sikakangas Zone.
