About Kimber

Kimber owns mineral concessions covering in excess of 39,000 hectares in the prospective Sierra Madre gold-silver belt, including the Monterde property, where three gold-silver mineral resources have already been defined. The most advanced of these, the Carmen deposit, has been extensively drilled and has undergone detailed geologic modeling. The completion of the Updated Preliminary Economic Assessment for Monterde in 2011 represented a significant step forward for Kimber and supported further evaluation and more advanced economic studies at the Monterde deposits, with the 2012 Updated Mineral Resource Estimate Technical Report for the Carmen deposit representing a component of those activities.

About Invekture

Invekture is the holding company of [Frontera Copper Corp.](#) ("FCC") and owns 100% of FCC. FCC was listed on the TSX since 2004 until it was acquired by Invekture through a tender offer for all of its outstanding shares and options in May, 2009. FCC's main asset is the Piedras Verdes Copper Mine, of which FCC holds a 72% interest, located close to Alamos in the State of Sonora in North Western Mexico. The Piedras Verdes Copper Mine produces approximately 70 million pounds of Grade A LME Copper Cathode annually from an open pit crushed heap leach operation.
