

New Core Drilling by Paramount Gold and Silver Intersects High Grade Values at San Miguel Project in Mexico

14.01.2014 | [Marketwired](#)

All six holes at Don Ese intersected very high grades including 36.5 meters of 3.66 g/T gold and 222 g/T silver (7.7 g/T gold equivalent); other intercepts up to 56 g/T gold and 4.8 kg/T silver (141 opt)

WINNEMUCCA, NEVADA--(Marketwired - Jan 14, 2014) - [Paramount Gold and Silver Corp.](#) (NYSE MKT:PZG)(TSX:PZG)(FRANKFURT:P6G)(WKN:A0HGKQ) ("Paramount") today reported outstanding results from the first phase of an ongoing core drilling program on its 100%-owned San Miguel Project in northern Mexico.

As previously announced, Paramount recently resumed drilling with two core rigs at its San Miguel Project ([see November 25, 2013 news release](#)). The drill program is designed to move the San Miguel Project towards an updated Preliminary Economic Assessment (PEA) which could incorporate a heap leach scenario for mid-to-lower-grade material. Objectives for the current work program include: (1) adding resources at two new high priority exploration targets; (2) acquiring material for further metallurgical testing of heap leach processing; and (3) upgrading inferred resources to measured and indicated.

Drilling began in the Don Ese area, immediately adjacent to Coeur d'Alene's Guadalupe mine (part of the Palmarejo Mine Complex), to convert inferred resources to measured and indicated and acquire material for metallurgical tests. Results demonstrate that the resource model is sound and that upgrading resources is likely only a matter of drill spacing. "We expect these outstanding new intercepts to increase both the size and grade of the Don Ese resource as well as moving more of it into the indicated category," Paramount CEO Christopher Crupi said, "The Don Ese deposit continues to improve every time we work on it."

Results from the six additional holes drilled in late 2013 are as follows:

Hole #	Total Length (m)	From (m)	To (m)	Width (m)	Au (g/T)	Ag (g/T)
DS-13-035	423.50	332.00	348.75	16.75	1.48	209.8
	Including	338.10	342.50	4.40	3.57	484.4
		352.85	357.75	4.90	0.14	25.4
		364.65	366.60	1.95	3.97	200.9
		398.15	398.65	0.50	1.00	247.0
DS-13-036		421.35	422.10	0.75	0.35	87.1
		429.80	432.45	2.65	2.18	133.8
	including	431.40	432.45	1.05	5.25	247.0
		439.75	470.30	30.55	0.74	86.3
	including	439.75	441.75	2.00	3.03	448.0

			300.25	301.65	1.40	0.51	89.9
			326.35	326.80	0.45	0.22	70.5
			344.80	345.45	0.65	0.75	210.0
			367.90	371.85	3.95	11.87	2,294.8
	including	369.70	371.85	2.15	18.00		3,435.4
	including	369.70	370.50	0.80	29.40		4,833.0
DS-13-041			374.30	376.10	1.80	0.51	161.7
		472.60	384.75	421.20	36.45	3.66	222.2
	including	393.55	397.35	3.80	2.77		243.0
	including	403.05	418.90	15.85	7.04		365.3
	including	405.05	409.65	4.60	16.51		723.5
	including	405.05	406.05	1.00	56.60		1,907.0
	including	407.05	408.00	0.95	10.90		483.0
		423.80	424.35	0.55	1.05		33.5
		427.70	428.95	1.25	1.71		130.3

True widths are expected to be at least 80% of reported intercepts.

NI 43-101 Disclosure

Exploration activities at San Miguel are being conducted by Paramount Gold de Mexico S.A de C.V personnel under the supervision of Glen van Treek, Exploration Vice President of the Company and Bill Threlkeld, a Qualified Person as defined by National Instrument 43-101, who have both reviewed and approved this press release. An ongoing quality control/quality assurance protocol is being employed for the program including blank, duplicate and reference standards in every batch of assays. Cross-check analyses are being conducted at a second external laboratory on 10% of the samples. Samples are being assayed at ALS Chemex and Acme Laboratories, Vancouver, B.C., using fire assay atomic absorption methods for gold and aqua regia digestion ICP methods for other elements.

San Miguel Project PEA

The PEA was prepared by Metal Mining Consultants ("MMC") of Denver, Colorado incorporating a resource model developed by MDA. The PEA confirms that the San Miguel Project represents an unusually robust economic opportunity to develop a low cost mine in the prolific Sierra Madre belt in Mexico. In their analysis, MMC proposed a 4,000 tonnes per day mill fed by open pits and underground mines, resulting in a projected 14 year operation with a total metal production of 803,000 ounces of gold and 43.2 million ounces of silver (1,637,000 ounces of gold equivalent at the base case gold-to-silver price ratio of 51.7 to 1).

Start-up capital costs including working capital are estimated at \$243 million. Sustaining capital costs over the project's life are projected to be an additional \$227 million. With \$70.3 million in contingencies, total life-of-mine capital costs are estimated at \$540 million. Projected life-of-mine average cash operating costs are \$512 per ounce of equivalent gold recovered. The total cost of production (including cash operating costs and total capital and contingency costs over the life of the mine) is estimated at US\$842 per ounce of gold equivalent, which compares favorably with current producers in the region. At a gold price of \$1500 per ounce and a silver price of \$29 per ounce (the 3 year trailing average of gold and silver prices at the end of January 2013), the San Miguel PEA estimated a \$1.1 billion pre-tax net cash flow, a \$707 million pre-tax net present value at a 5% discount rate and a highly accretive internal rate of return of 33.2%.

Note that the PEA incorporates inferred mineral resources which are considered to be too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and, as such, do not have demonstrated economic viability. There can be no certainty that the estimates contained in the PEA will be realized.

About Paramount

Paramount is a U.S.-based exploration and development company with multi-million ounce advanced stage precious metals projects in northern Mexico (San Miguel) and Nevada (Sleeper). Fully-funded exploration and engineering programs are now in progress at these two core projects which are expected to generate substantial additional value for our shareholders.

The San Miguel Project consists of over 142,000 hectares (over 353,000 acres) in the Palmarejo District of northwest Mexico, making Paramount the largest claim holder in this rapidly growing precious metals mining camp. The San Miguel Project is ideally situated near established, low cost production where the infrastructure already exists for early, cost-effective exploitation. A PEA for San Miguel was completed and announced on [February 28, 2013](#).

The Sleeper Gold Project is located off a main highway about 25 miles from the town of Winnemucca. In 2010, Paramount acquired a 100% interest in the project including the original Sleeper high-grade open pit mine operated by Amax Gold from 1986 to 1996 as well as staked and purchased lands now totaling 2,570 claims and covering about 47,500 acres which stretch south down trend to Newmont's Sandman project. This acquisition is consistent with the Company's strategy of district-scale exploration near infrastructure in established mining camps. A PEA was completed for Sleeper and announced on [July 30, 2012](#).

Summary of PZG's Estimated NI 43-101 Compliant Resources

MEASURED AND INDICATED RESOURCES

PROJECT	Tonnes	Au g/T	Au Ounces	Ag g/T	Ag Ounces
San Miguel	23,918,000	0.83	639,000	70.0	53,559,000
Sleeper	326,963,000	0.33	3,479,000	3.86	40,606,000
Total			4,118,000		94,165,000

INFERRED RESOURCES

PROJECT	Tonnes	Au g/T	Au Ounces	Ag g/T	Ag Ounces
San Miguel	37,470,000	0.69	830,000	38.00	46,243,000
Sleeper	223,624,000	0.27	1,972,000	2.84	20,459,000
Total			2,802,000		66,702,000

For details on these resource estimates please see the following news releases: [San Miguel Resource Estimate, September 5, 2012](#); and Sleeper Resource Estimate, [July 30, 2012](#).

Cautionary Note to U.S. Investors Concerning Estimates of Indicated and Inferred Resources

This news release uses the terms "measured and indicated resources" and "inferred resources". We advise U.S. investors that while these terms are defined in, and permitted by, Canadian regulations, these terms are not defined terms under SEC Industry Guide 7 and not normally permitted to be used in reports and registration statements filed with the SEC. "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of a feasibility study or prefeasibility studies, except in rare cases. The SEC normally only permits issuers to report mineralization that does not constitute SEC Industry Guide 7 compliant "reserves", as in-place tonnage and grade without reference to unit measures. U.S. investors are cautioned not to assume that any part or all of mineral deposits in this category will ever be converted into reserves. U.S. investors are cautioned not to assume that any part or all of an inferred resource exists or is economically or legally minable.

Safe Harbor for Forward-Looking Statements:

This release and related documents may include "forward-looking statements" including, but not limited to, statements related to the interpretation of drilling results and potential mineralization, future exploration work at the San Miguel Project and the expected results of this work, estimates of resources including expected volumes and grades and the economic projections included in the project's PEA. Forward-looking statements are statements that are not historical fact and are subject to a variety of risks and uncertainties which could cause actual events to differ materially from those reflected in the forward-looking statements including

fluctuations in the price of gold, inability to complete drill programs on time and on budget, and future financing ability. Paramount's future expectations, beliefs, goals, plans or prospects constitute forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and other applicable securities laws. Words such as "believes," "plans," "anticipates," "expects," "estimates" and similar expressions should also be considered to be forward-looking statements. There are a number of important factors that could cause actual results or events to differ materially from those indicated by such forward-looking statements, including, but not limited to: uncertainties involving interpretation of drilling results, environmental matters, lack of ability to obtain required permitting, equipment breakdown or disruptions, and the other factors described in Paramount's Annual Report on Form 10-K for the year ended June 30, 2013 and its most recent quarterly reports filed with the SEC.

Except as required by applicable law, Paramount disclaims any intention or obligation to update any forward-looking statements as a result of developments occurring after the date of this document.
