

Petrichor Energy Reports that Hinson #1 Well has been Completed and Flow Testing has Commenced

04.02.2014 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Feb 4, 2014) - [Petrichor Energy Inc.](#) (TSX VENTURE: **PTP**)(FRANKFURT:**YQN**) (the "Company") announces that the Hinson #1 well (reference News Release December 3, 10 & 12, 2013) has been cased, and installation of production equipment has been completed. The well is now being evaluated for optimal initial production from the Caddo Lime, Marble Falls, Barnett Shale or Mississippi Lime formations. Management is pleased with the preliminary results of the well, which the operator successfully completed under budget and ahead of schedule. The production evaluation is expected to take approximately two weeks.

The Company owns a 66.67% working interest in the prospect, which covers 11,695.33 acres to date, located within Young County, Jack County, Archer County and Clay County, Texas.

The Mississippi Lime is a Mississippian age porous limestone formation that is deposited beneath the Barnett Shale, which is analogous to the Mississippi Lime play in Kansas and Oklahoma. The Marble Falls formation is a Pennsylvanian age limestone, analogous to the Strawn Lime play in West Texas. To date, independent operators have drilled over 50 vertical and horizontal multi-stage fraced wells in the Marble Falls and Mississippi limestone with positive results.

ON BEHALF OF THE BOARD

Joe DeVries, CEO & President

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

This news release includes certain forward-looking statements or information. All statements other than statements of historical fact included in this release, including, without limitation, statements relating other future plans, objectives or expectations of the Company are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's plans or expectations include risks relating to: availability of capital and financing required to continue the Company's exploration programs and operations; general economic, market or business conditions; the actual results of current and planned exploration activities; fluctuating commodity prices; risks associated with participation agreements, leases, joint ventures and the ability to conclude such agreements on favourable terms; possibility of accidents, equipment breakdowns and delays during exploration and production; cost overruns or unanticipated costs and expenses; regulatory changes and restrictions including in relation to environmental liability; timeliness of government or regulatory approvals and other risks detailed herein and from time to time in the filings made by the Company with securities regulators. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as otherwise required by applicable securities legislation.
