

# Durango Resources Inc. Receives Title to Land Adjacent to Miller Mine Project With 99.99% Pure Graphite

12.12.2013 | [ACCESS Newswire](#)

December 12, 2013 - [Durango Resources Inc.](#) (the "Company") is pleased to announce it has received its 100% interest in approximately 240 hectares of graphite potential ground contiguous to Canada Carbon's historic Miller Graphite Mine property. The recently titled ground, known as Buckshot, is located along the eastern perimeter of Canada Carbon's claims, approximately 70km west of Montreal, near Grenville, Quebec.

[Caribou King Resources Ltd.](#) (TSX.V - CCB) CEO, Mr. Bruce Duncan announced today via SEDAR, "Canada Carbon achieves 99.9978% purity by rapid thermal upgrading of miller vein graphite" and "this is important information, because very pure graphite currently sells for much higher prices than less pure graphite material. Moreover, the specific contaminants present can influence the high-technology applications for which the graphite is suitable."

Durango is currently in discussions regarding a Phase I exploration program for the 100% owned Buckshot property adjoining the historic Miller Graphite producing property.

## About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mining/exploration properties, mainly for gold and other precious metals. The Company has a 100% undivided interest in the McGillivray Property in British Columbia, the Sol Riche and Tresor Nord/Sud REE properties in Montviel Township in Quebec, the Trove and Descouverte gold properties in the Abitibi of Quebec, the Montpellier and St. Sixte graphite properties in the Grenville region of Quebec, and the Stubble gold property in Saskatchewan.
