About SilverCrest

SilverCrest Mines Inc. (TSX VENTURE:SVL) (NYSE MKT:SVLC) is a Canadian precious metals producer headquartered in Vancouver, BC. SilverCrest's flagship property is the 100%-owned Santa Elena Mine, located 150 km northeast of Hermosillo, near Banamichi in the State of Sonora, Mexico. The mine is a high-grade, epithermal silver and gold producer, with an estimated life of mine of 8 years and cash costs of \$11 per ounce of silver equivalent (55:1 Ag:Au) for the open pit heap leach and underground mine. SilverCrest anticipates that the new 3,000 tonnes per day conventional mill facility at the Santa Elena Mine should recover an average annual rate of 1.5 million ounces of silver and 32,800 ounces of gold over the current reserve. Major expansion and construction of the 3,000 tonnes per day conventional mill facility is nearing completion and is expected to significantly increase metals production at the Santa Elena Mine (open pit and underground) in 2014 and beyond. Exploration programs continue to make new discoveries at Santa Elena and also have rapidly advanced the definition of a large polymetallic deposit at the La Joya property in Durango State with stated resources nearing 200 million ounces of Ag equivalent.

These statements relate to analyses and other information that are based on

expectations of future performance, including silver and gold production and planned work programs. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the forward-looking statements. The Company's forward-looking statements are based on beliefs, expectations and opinions of management on the date the statements are made. For the reasons set forth above, investors should not place undue reliance on forward-looking statements.
