

McEwen Mining El Gallo 1 Mine Expansion Nears Completion

20.02.2014 | [Marketwired](#)

Ahead of Schedule & Below Budget

2015 Production Estimate 75,000 oz. Gold - Cash Cost US\$575 per oz.

TORONTO, ONTARIO--(Marketwired - Feb 20, 2014) - [McEwen Mining Inc. \(NYSE:MUX\) \(TSX:MUX\)](#) is pleased to announce that the expansion of the El Gallo 1 mine in Sinaloa State, Mexico is scheduled to be completed by early April. The expansion is approximately three months ahead of schedule and capital costs are expected to total US\$3 million versus the US\$5 million originally budgeted. Production is anticipated to grow from 37,500 oz. gold this year to 75,000 oz. gold in 2015. Cash costs are also expected to decrease from US\$750 per oz. to US\$575 per oz. starting next year.

Commissioning is expected to commence during Q2, with the expansion fully operational during the second half of the year. El Gallo 1 is being expanded from 3,000 tonnes per day (tpd) to 4,500 tpd. In addition to the expansion, gold grades are expected to increase starting in 2015 from approximately 1.1 gpt to 2.0 gpt.

"Our team in Mexico, along with the company's main contractor, SAR Servicios Tecnicos, has done a good job expanding the El Gallo 1 mine. Our skill set within Mexico continues to grow and this is an important learning experience should the company proceed with the construction of El Gallo 2. With the expansion and higher gold grades, we expect the mine to generate US\$30 million in annual free cash flow before taxes starting next year (at a \$1,300 gold price)", stated Rob McEwen, Chairman and Chief Owner.

About McEwen Mining (www.mcewenmining.com)

The goal of McEwen Mining is to qualify for inclusion in the S&P 500 by creating a high growth gold producer focused in the Americas. McEwen Mining's principal assets consist of the San José mine in Santa Cruz, Argentina (49% interest); the El Gallo complex in Sinaloa, Mexico; the Gold Bar project in Nevada, US; the Los Azules project in San Juan, Argentina and a large portfolio of exploration properties in Argentina, Mexico and Nevada.

McEwen Mining has 297,159,359 shares issued and outstanding at February 20, 2014, which consists of both common and exchangeable shares. Each exchangeable share is convertible into a common share on a one-for-one basis and holds the same rights as each common share. Rob McEwen, Chairman, and Chief Owner, owns 25% of the shares of the Company.

TECHNICAL INFORMATION:

This news release has been reviewed and approved by William Faust, PE, McEwen Mining's Chief Operating Officer, who is a Qualified Person as defined by National Instrument 43-101 ("NI 43-101"). For

additional information about the El Gallo complex see the technical report titled "Resource Estimate for the El Gallo Complex, Sinaloa State, Mexico" dated August 30, 2013 with an effective date of June 30, 2013, prepared by John Read, C.P.G., and Luke Willis, P. Geo. Mr. Read and Mr. Willis are not considered independent of the Company as defined by NI 43-101.

There are significant risks and uncertainty associated with construction, commencing or expanding production or changing production plans without a current feasibility, pre-feasibility or scoping study. As such, El Gallo 1 may ultimately be determined to lack one or more geological, engineering, legal, operating, economic, social, environmental, and other relevant factors reasonably required to serve as the basis for a final decision to successfully complete the expansion of all or part of this project.

The foregoing news release and technical reports are available under the Corporation's profile on SEDAR (www.sedar.com).

CAUTIONARY NOTE TO US INVESTORS

McEwen Mining prepares its resource estimates in accordance with standards of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in Canadian National Instrument 43-101 (NI 43-101). These standards are different from the standards generally permitted in reports filed with the SEC. Under NI 43-101, McEwen Mining reports measured, indicated and inferred resources, measurements which are generally not permitted in filings made with the SEC. The estimation of measured resources and indicated resources involve greater uncertainty as to their existence and economic feasibility than the estimation of proven and probable reserves. U.S. investors are cautioned not to assume that any part of measured or indicated resources will ever be converted into economically mineable reserves. The estimation of inferred resources involves far greater uncertainty as to their existence and economic viability than the estimation of other categories of resources.

CAUTIONARY NOTE REGARDING NON-GAAP MEASURES

In this news release, we have provided non-U.S. GAAP ("non-GAAP") performance measures. Because the non-GAAP performance measures do not have any standardized meaning prescribed by U.S. GAAP, they may not be comparable to similar measures presented by other companies.

Total cash costs consist of mining, processing, on-site general and administrative costs, royalty costs, refining and treatment charges, sales costs and operational stripping costs. All-in sustaining cash costs consist of total cash costs (as described above), plus environmental rehabilitation costs, mine site exploration and sustaining capital expenditures. Depreciation is excluded from both total cash costs and all-in sustaining cash costs. Total cash cost and all-in sustaining cash cost per ounce are calculated on a co-product basis by dividing the respective proportionate share of the total cash costs and all-in sustaining cash costs for the period attributable to each metal by the ounces of each respective metal sold.

CAUTION CONCERNING FORWARD-LOOKING STATEMENTS

This news release contains certain forward-looking statements and information, including "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The forward-looking statements and information expressed, as at the date of this news release, [McEwen Mining Inc.](#)'s (the "Company") estimates, forecasts, projections, expectations or beliefs as to future events and results. Forward-looking statements and information are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties, risks and contingencies, and there can be no assurance that such statements and information will prove to be accurate. Therefore, actual results and future events could differ materially from those anticipated in such statements and information. Risks and uncertainties that could cause results or future events to differ materially from current expectations expressed or implied by the forward-looking statements and information include, but are not limited to, factors associated with fluctuations in the market price of precious metals, mining industry risks, political, economic, social and security risks associated with foreign operations, risks associated with the construction of mining operations and commencement of production and the projected costs thereof, risks related to litigation, the state of the capital markets, environmental risks and hazards, risks related to the receipt of required permits and other governmental approvals, uncertainty as to calculation of mineral resources and reserves and other risks.

Readers should not place undue reliance on forward-looking statements or information included herein, which speak only as of the date hereof. The Company undertakes no obligation to reissue or update forward-looking statements or information as a result of new information or events after the date hereof except as may be required by law. See McEwen Mining's Annual Report on Form 10-K for the fiscal year ended December 31, 2012 and other filings with the Securities and Exchange Commission, under the caption "Risk Factors", for additional information on risks, uncertainties and other factors relating to the forward-looking statements and information regarding the Company. All forward-looking statements and information made in this news release are qualified by this cautionary statement.

The NYSE and TSX have not reviewed and do not accept responsibility for the adequacy or accuracy of the contents of this news release, which has been prepared by management of [McEwen Mining Inc.](#)
