1. The average selling price is calculated on the ounces of gold sold in December (2,863oz). The ounces sold in October and November were credited against the capital cost.
2. The cash cost per ounce sold include the extraction cost, milling costs, on-site costs, and the royalties.

During this quarter (Q2), Metanor milled 62,033 tonnes of ore at a feed grade of 6.6 g/T and a recovery of 97.5% producing 12,751 ounces of gold. On December 31st 2013, Metanor had a gold inventory of 2,375 ounces at the Royal Canadian Mint. This higher inventory was related to the longer processing delays of the holiday period.

Outlook for the coming quarters

The company continues to develop new drifts to the west which will allow access to new zones and increase the production toward a full capacity. The company will increase the diamond drilling in the coming months in order to eventually add new resources and reserves.
