

Camino Minerals Corporation: Maijoma Project Drill Results

14.03.2014 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Mar 14, 2014) - [Camino Minerals Corp.](#) (TSX VENTURE:COR) ("Camino" or the "Company") announces that it has received final assay results from the recently completed reverse circulation drill program carried out at the Maijoma Project ("Maijoma"), located in Chihuahua State, Mexico.

Camino drilled five holes at Maijoma, totaling 1,038 metres, testing two gravity anomalies that coincided with anomalous silver, lead and zinc values obtained in rock sampling. Although anomalous zinc, silver and lead values were intersected, they are not significant enough to warrant any further exploration work.

Camino is actively seeking to acquire new projects located in the Americas that offer discovery opportunity. The Company has reviewed close to 100 projects and has conducted several site visits. Camino hopes to make an acquisition in the very near future.

About Camino Minerals Corporation

Camino is a discovery-oriented mineral exploration company formed in connection with Goldcorp's C\$300-million acquisition of Canplats. The Company is led by Canplats' former management and is focused on precious and base metal projects located in Mexico. For more information on Camino's projects, please refer to the Company's website at www.caminominerals.com.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Cautionary Note Regarding Forward-Looking Statements

Statements contained in this news release that are not historical fact are forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995 and forward-looking information under the provisions of Canadian securities laws (collectively, "forward-looking statements"). Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from estimated results. Such risks and uncertainties include, but are not limited to, the company's ability to raise sufficient capital to fund exploration, changes in economic conditions or financial markets, changes in prices for the company's mineral products or increases in input costs, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments in Mexico, technological and operational difficulties or inability to obtain permits encountered in connection with exploration and development activities, labour relations matters, and changing foreign exchange rates, all of which are described more fully in Camino's filings on SEDAR. The company undertakes no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events or other factors, except as required by law. Readers are cautioned not to place undue reliance on forward-looking statements.
