*Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*

*The Company has not established mineral resources and has not completed a valid mining study (as defined by NI 43-101) to support its production decision at the Nuevo San Pedro Mine. Historically, a production decision under these circumstances results in much higher economic or technical risk. Furthermore, without a pre-feasibility or feasibility study and a graphite reserve, there can be no assurance that operations at Nuevo San Pedro will be profitable.*
