PERTH, AUSTRALIA -- (Marketwired - April 28, 2014) - [Western Areas](#) (WSA or the Company) (ASX:WSA) is pleased to report another strong quarterly performance on costs, operational metrics and positive free cashflow generation. Unit cash cost of production was A\$2.52/lb of nickel in concentrate for the quarter, being slightly lower than the December quarter. Year to date unit cash costs sit at A\$2.46/lb.

Consolidated cash at bank increased by A\$75.6m to A\$175.5m which includes A\$4.4m of funds held by the majority owned FinnAust Mining Plc. Excluding the equity placement proceeds received, the repurchase of A\$15m of July 2014 convertible bonds and half yearly convertible bond interest payments, free cashflow for the quarter was A\$13.0m.

Total mine production for the quarter was 6,709 tonnes of nickel in ore at an average head grade of 4.4% nickel, with the Flying Fox mine contributing 3,243 tonnes and Spotted Quoll mine 3,466 tonnes of nickel in ore respectively. Nickel in concentrate production and sales were steady at 6,344 tonnes and 6,418 tonnes respectively.

The Indonesian Government's ban on the export of laterite ore has resulted in a rebound in the nickel price on forecast tighter supply fundamentals.
