About the Windfall Lake Gold Project

The Windfall Lake gold deposit comprises a number of lenses of pyritic stockwork and shear zones situated in the Archean Urban-Barry Greenstone Belt, approximately 200 km northeast of Val d'Or, Quebec. SRK Consulting (Canada) Inc. prepared a mineral resource statement for Eagle Hill in compliance with National Instrument 43-101 in February 2014 comprising 2,375,000 tonnes at 9.75 g/t gold (744,000 ounces) in the indicated category and 3,084,000 tonnes at 7.37 g/t gold (731,000 ounces) in the inferred category.
