

# Top Technology Investment Opportunities at the Canadian Investor Conference

10.05.2014 | [ABN Newswire](#)

Vancouver, Canada (ABN Newswire) - On June 1 and 2, 2014 at Vancouver's premier event space - The Vancouver Convention Centre West, businesses, investors and analysts will gather for the Canadian Investor Conference to share ideas and explore financing and investing opportunities.

For the last 19 years Cambridge House International has established itself as the top conference producer connecting retail and institutional investors with opportunities in the resource space. During the last two years Cambridge House has expanded operations to include top quality investment offerings from a variety of additional sectors - one in particular that has garnered notable success has been Canadian Technology.

Canada's technology sector has been experiencing an astonishing influx of investment and growth. Homegrown companies such as Hootsuite, Avigilon, Ballard Power Systems and MDA (MacDonald Dettwiler & Associates), have inspired high-profile international companies like Microsoft, Twitter and Disney to set up operations in Vancouver. The Technology sector currently provides 84,000 jobs for British Columbians and revenues of \$18 billion a year, and has been the second-largest contributor to private-sector job growth in the last decade.

At the past Cambridge House Cantech Investment Conference in January 2014, investors had the chance to connect with top performing technology companies such as Avigilon, Baylin Technologies, QHR Technologies and Oculus Rift - a company that was subsequently picked up by Facebook two months later for \$2 Billion. Featured conference speakers included Commander Chris Hadfield, former Captain of the International Space Station.

On June 1 and 2, 2014 in Vancouver, Cambridge House will deliver another showcase of exceptional opportunities in the technology field at the Canadian Investor Conference including FLYHT Aerospace Solutions Ltd., POET Technologies Inc., Theralase Technologies Inc., Tinkerine, Urthecast Corp., Verisante Technology Inc., WordLogic Corporation and more. Supporters include Bill Tam, the President and CEO of the British Columbia Technology Industry Association, Andrew Reid, founder of Vision Critical and Brent Holliday, Founder and CEO of Garibaldi Capital Advisors among others. Bill Tam, the President and CEO of the British Columbia Technology Industry Association suggests, "Tradeshows are an important part of broadening the awareness of home grown success stories. This helps to encourage customers, partners and investors to support BC tech companies."

Another new feature, The PowerHaus Pavilion, hosted by GreenAngel Energy and as seen at GLOBE 2014, will host growing Canadian companies seeking financing and customers for their clean technology solutions. "The PowerHaus Network was created in 2013 by SFU, NRC, and GreenAngel Energy to provide capital and management to emerging green-tech ventures," says Mike Volker, Director, SFU Innovation Office. Companies showcasing their technologies will include: Solaris Manufacturing Inc., Newnote Financial, Aquatic Informatics Inc., Kairama, VeloMetro and Autris. These companies will also be offering PowerPitch presentations in the Technology Speaker Hall where investors will see first-hand the huge market potential of technologies and sustainability solutions on display in the PowerHaus Pavilion.
