

Robex-Nampala: Start Up of the Nampala Plant

27.05.2014 | [Marketwired](#)

QUEBEC CITY, QUEBEC--(Marketwired - May 27, 2014) - **Robex Resources Inc.** ("Robex" or the "Company") (TSX VENTURE:RBX)(FRANKFURT:RB4) is proud to announce the launch of its gold plant in Nampala, Mali. In fact, the plant, now in partial operation, handles more than 1,600 tons of ore per day.

The "commissioning" of the plant (or the testing of the various sections of the plant) has thus started. This has already led to minor technical adjustments. The Company can now say that the plant start-up took place and it is positive.

The test phase of the production has started with a reduced daily tonnage at first. The plant is already operating at a capacity of 1,600 tons/day. The analysis of the consumption parameters (electricity, reagents, recovery and water) are in accordance with the feasibility study and have potential for improvement.

The Nampala plant should reach 2,500 tons/day within 3 to 4 months and enter the optimized production phase. Additional interstage screening devices will be required as well as additional cyanidation tank in order to proceed to phase-2, which aims for 4,000 + t / d.

The need to train staff remains a priority to achieve our goals of optimal production to 6,000 t / d in the medium term.

Mister Georges Cohen, Chairman and CEO, comments:

"I wish to underline my whole trust and supports to the teams in position in Nampala and to thank them for their efforts and their work. In spite of numerous, still very common, difficulties of starting up, we reached an encouraging daily production for the future.

Our forecasts: the current daily tonnage handled in the mine will probably reach 2,500 t/j in the coming months to improve to - by adding some complementary equipments - 4 000 t/j at the beginning of next year and still more to come in 2015. "

Additional Information for Shareholders of Robex Resources Inc.:

- **09/06/2014, Montreal:** Robex wishes to invite its shareholders to attend the speech given by Georges Cohen at the International Economic Forum of the Americas, **June 9, 2014** from 7:30 to 8:30 AM. This press release contains statements that may constitute "forward-looking information" or "forward-looking

statements" as set out within the context of security law. This forward-looking information is subject to many risks and uncertainties, some of which are beyond Robex Inc.'s ("Robex") control. The actual results or conclusions may differ considerably from those that have been set out, or intimated, in this forward-looking information. There are many factors which may cause such disparity, especially the instability of metal market prices, the results of fluctuations in foreign currency exchange rates or in interest rates, poorly estimated reserves, environmental risks (stricter regulations), unforeseen geological situations, unfavourable extraction conditions, political risks brought on by mining in developing countries, regulatory and governmental policy changes (laws and policies), failure to obtain the requisite permits and approvals from government bodies, or any other risk relating to mining and development. There is no guarantee that the circumstances anticipated in this forward-looking information will occur, or if they do occur, how they will benefit Robex. The forward-looking information is based on the estimates and opinions of Robex's management at the time of the publication of the information and Robex does not assume any obligation to make public updates or modifications to any of the forward-looking statements, whether as a result of new information, future events, or any other cause, except if it is required by securities laws.

The TSX Venture Exchange or its Regulation Services Provider (as defined in the policies of the TSX Venture Exchange) accepts no liability for the authenticity or accuracy of this release.
