

Nevada Clean Magnesium Announces 1,100,000 Stock Option Grant

29.05.2014 | [The Newswire](#)

VANCOUVER - May 29, 2014 - [Nevada Clean Magnesium Inc.](#) (TSXV: NVM; Frankfurt-M1V; OTC Pink Sheets: MLYFF) (the "Company") today announced that it has granted 1,100,000 incentive stock options pursuant to its Stock Option Plan for its directors, advisors and consultants. The options are exercisable at a price of \$0.08 per share for a five-year term.

Any shares issued on the exercise of these stock options will be subject to a four-month hold period from the date of the grant. This stock option grant is subject to approval of the TSX Venture Exchange.

About Nevada Clean Magnesium, Inc.

Nevada Clean Magnesium is focused on becoming a major U.S. producer and distributor of primary, high grade, low cost magnesium extracted from its 100% owned Tami-Mosi property located in North Central Nevada. Based on the Company's NI 43-101 Preliminary Economic Assessment Report published in late 2011, the Tami-Mosi Project has an inferred resource of 412 million tonnes with an average grade of 12.3% Mg for a contained metal content of 111 billion pounds of magnesium using a 12% cut-off grade contained within a high purity dolomite block. Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward Looking Statements

Statements in this news release that are not historical facts are forward-looking statements that are subject to risks and uncertainties. Forward-looking statements in this news release include statements about the closing a joint venture and private placement.

Actual results may differ materially from those currently anticipated due to a number of factors, including that we may not be able to agree on final terms with ScanMag, that the Company's dolomite reserves may not be mined because of technical, regulatory, financing or other obstacles, the market price for magnesium may make our resources uneconomic, and other risks associated with being a mineral exploration and development company. The PEA is based on inferred mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability. These forward-looking statements are made as of the date of this news release and, except as required by applicable laws, the Company assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements.
