

Alpha Exploration's Winter Program at Middle Lake, Athabasca Basin, Northern Saskatchewan has Drilling Underway

18.02.2014 | [Newsfile](#)

Vancouver, British Columbia -- (Newsfile Corp. - February 18, 2014) - [Alpha Exploration Inc.](#) (TSXV: AEX) ("Alpha" or the "Company") is pleased to announce that drilling is underway at the Middle Lake property, owned 80% by Alpha and 20% by [Acme Resources Inc.](#) (TSXV: ARI) as a carried interest. The property is located in the west part of Saskatchewan's Athabasca Basin along the east boundary of the former Cluff Lake mine lease of operated by Areva. Field preparations began in early January, which comprised temporary work camp construction and a gravity survey (see Alpha news release January 20th, 2014).

MWH Geo-Surveys Ltd. of Vernon, BC has completed an approximate 1800 station gravity survey on three different grids. Newmac Industries Ltd. of Prince Albert, SK has been contracted for a 20-hole, 2,000 m diamond drill program to test gravity, EM conductors, and geochemical (radon and helium).

The exploration target at Middle Lake is shallow, high-grade uranium mineralization hosted in basement rocks at approximately 10 to 20 meters below surface (ie. below glacial till and sediments). Drill targets are northeast (up-ice) from two historical uranium boulder and radon trains discovered in the 1970's by AREVA. The recent gravity survey has delineated prospective gravity low targets that are coincident with VTEM and historical EM conductors, favourable magnetic transitions, and geochemical (radon and helium) anomalies.

Current maps and information on Alpha Exploration and the Middle Lake property, can be found on the Company's website at www.alpha-aex.com.

About Alpha Exploration Inc.

[Alpha Exploration Inc.](#) is a mineral exploration company whose uranium experience was developed with the discovery of the Roughrider deposits and subsequently the Patterson Lake discovery in 2012 in the successful JV with Fission Uranium. The principals of the company comprise a team that were involved in the discovery and development of those world class deposits. The company started with a principal focus in the exploration and development of its Mikwam Gold property in Ontario, and that focus has been moved to development of uranium properties in the Athabasca Basin in northern Saskatchewan, Canada. Common Shares are listed on the TSX Venture Exchange under the symbol "AEX". Additional information about Alpha is available on Alpha's website at www.alpha-aex.com or under its profile on SEDAR at www.sedar.com.

The technical information in this news release has been prepared in accordance with the Canadian regulatory requirements set out in National Instrument 43-101 and reviewed on behalf of Alpha Exploration Inc., by Garrett Ainsworth, P.Geo. Vice President Exploration, a qualified person.

On behalf of the Board of Directors of Alpha Exploration Inc.
