

Durango Explores Decouverte Targets

20.06.2014 | [The Newswire](#)

Vancouver, BC / TNW-ACCESSWIRE / June 20, 2014 / [Durango Resources Inc.](#) (the "Company" or "Durango") announces that, further to its news release dated May 5, 2014, the Company has visited the Decouverte (Discovery) property in northern Quebec and taken chip and channel samples from its priority exploration targets as outlined below.

Click Image To View Full Size

Marcy Kiesman, CEO, stated, "This initial exploration program was strategically conducted to provide data for testing a geological theory on the Decouverte property. With the initial program concluded, Durango's geological team is now focused on formulating exploration reports and a detailed news release outlining the program will be released shortly."

About Decouverte

The Decouverte (Discovery) property of 5100 ha, is located 100km north of Chibougamau, Quebec in the Frotet - Evans greenstone belt. Durango carried out a 439 line kilometer helicopter borne DIGHEM EM/magnetic airborne geophysical survey on the property in 2011 (NR Nov 24, 2011). The property benefits from very favorable infrastructure including road accessibility (within 10km of Route du Nord and a myriad of logging roads), and a power line which bisects the property.

About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Decouverte and Trove gold properties in the Abitibi of Quebec, the McGillivray property in British Columbia, the Albany Spurs graphite property in northeastern Ontario and the Buckshot graphite property near the Miller Graphite mine in Quebec.
