Company Profile:

AMR is one of the few new sources of nickel sulphide supply globally. AMR commenced commercial production from its Ban Phuc nickel project in Vietnam in mid-2013. The Ban Phuc project currently produces over 6,400 tonnes of nickel and 3,200 tonnes of copper per annum contained in concentrate, plus a cobalt by-product.

In addition to in and near-mine expansion projects, Ban Phuc provides a cash-generative operating platform from which AMR can continue to focus on developing a new nickel camp within its 150km² of concessions located throughout the highly-prolific Song Da rift zone, where AMR has a number of advanced-stage nickel exploration targets.
