

Alabama Graphite Creates Technical Advisory Council and Appoints Leading Carbon Expert Dr. Nitin Chopra from the University of Alabama as Inaugural Member

19.08.2014 | [The Newswire](#)

Vancouver, BC / TNW-ACCESSWIRE / August 19, 2014 - [Alabama Graphite Corp.](#) (the "Company") (TSX-V:ALP) (OTCQX:ABGPF) (FRANKFURT: 1AG WKN: A1J35M) (ISIN# CA0102931080) is pleased to announce that Dr. Nitin Chopra, Associate Professor in the Department of Metallurgical and Materials Engineering and an adjunct professor in the Department of Biological Sciences at The University of Alabama, has joined the Company's Technical Advisory Council. The council will include members that have specific technical, regulatory or administrative expertise necessary to rapidly advance the Company's flagship Coosa Graphite Project, located in Coosa County, Alabama, USA.

Dr. Chopra's research interests include development of nanoscale heterostructures based on graphene/carbon nanotubes/carbon nanocapsules, their growth mechanisms and reactor design, surface modification/materials chemistry and purification of carbon materials, materials characterization of nanomaterials using microscopic and spectroscopic methods, and applications in biofunctional surfaces, sensors, energy, complex nanoarchitectures, and devices. Dr. Chopra is the recipient of the 2010 Young Leader Professional Development Award of The Minerals, Metals, and Materials Society (TMS), the 2011 TMS Young Leader International Scholar Award. He was inducted into the 2010 class of Emerging Professionals in the American Society of Metals (ASM) International. He is an honorary fellow of the Australian Institute of High Energetic Materials. Dr. Chopra is the founding Editor-in-Chief of the journal, "Nanomaterials and Energy" (ICE Publishing, UK). He serves on various technical and programming committees for TMS and ASM International. He additionally served on the American Chemical Society as their Chair of the local Alabama section. He has published more than 70 peer-reviewed research articles, including publications in Nature and Science, over 80 conference presentations, and 100 invited talks nationally and internationally. His h-index is 20+ and his work has been cited more than 2400 times. Dr. Chopra is also a recipient of the University of Alabama's 2013 Faculty Fellow in Service Learning Award.

Dr. Chopra earned his undergraduate engineering degree (Materials and Metallurgical Engineering) from the Indian Institute of Technology, Kanpur (India) in 2001, and a doctoral degree in Materials Science and Engineering from the University of Kentucky (2005). After completing his Ph.D., Dr. Chopra worked as a postdoctoral fellow at the University of Kentucky (Department of Chemistry, 2005-2009) where he studied nanostructures and soft biomaterials for their applications in drug delivery, chemical and biological sensors, supercapacitors, and biofuel cells. His research from 2001 led to several breakthroughs and high-impact publications in the area of carbon nanotubes, nanoporous carbon membranes, and shadow lithography method for molecular electronics.

"We are delighted to have an individual of Dr. Chopra's caliber, located right in our "backyard", to join the Company's advisory council" stated Ron S. Roda, President & CEO. "Dr. Chopra's unique vantage point of the carbon industry will be an invaluable asset to the Company and we are looking forward to developing a public/private partnership that could re-establish the graphite/carbon industry in the State of Alabama."

Dr. Chopra stated, "I continue to be impressed by the nature of the Coosa natural flake graphite deposit right in my backyard. For a person accustomed to working with synthetic graphite/carbon materials, I have been amazed by the potential to use natural flake graphite in the next generation of technological advancements ranging from electronics to batteries and surpassing the challenges associated with synthetic graphite/carbon production methods."

About Alabama Graphite:

[Alabama Graphite Corp.](#)'s mission is to become one of the greenest graphite producers in the world. The

Company, through its wholly-owned subsidiary, Alabama Graphite Company Inc., is conducting exploration and development on its flagship project "The Coosa Graphite Project" in Coosa County, Alabama, USA. The project encompasses over 40,000 acres and is located in an area with significant historical production of crystalline flake graphite. The Coosa Graphite project is 100% owned by Alabama Graphite and on private land. The Company's property has in place critical infrastructure, is within close proximity to transportation routes and a hospitable climate allowing for year-round production and delivery. The Company published an inaugural mineral resource estimate in July 2013, which was revised in March 2014, is continuing to define the footprint of the "The Coosa Graphite Project" and will look to start work on the 100% owned "Hearst Graphite Property" in Northern Ontario. For further information and updates on the Company please visit www.alabamagraphite.com.

Disclaimer for Forward-Looking Information

This press release contains forward-looking information under applicable Canadian securities laws ("forward-looking statements") that are based on the beliefs of management and reflect [Alabama Graphite Corp.](http://www.alabamagraphite.com)'s current expectations. When used in this press release, the words "estimate", "project", "belief", "anticipate", "intend", "expect", "plan", "predict", "may" or "should" and the negative of these words or such variations thereon or comparable terminology are intended to identify forward-looking statements. Such statements reflect the current view of [Alabama Graphite Corp.](http://www.alabamagraphite.com) with respect to risks and uncertainties that may cause actual results to differ materially from those contemplated in those forward-looking statements.

By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among other things, the interpretation and actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of graphite; possible variations in grade or recovery rates; failure of equipment or processes to operate as anticipated; the failure of contracted parties to perform; labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of exploration, as well as those factors disclosed in the Company's publicly filed documents. Forward-looking statements are also based on a number of assumptions, including that contracted parties provide goods and/or services on the agreed timeframes, that equipment necessary for exploration is available as scheduled and does not incur unforeseen breakdowns, that no labour shortages or delays are incurred, that plant and equipment function as specified, that no unusual geological or technical problems occur, and that laboratory and other related services are available and perform as contracted.

Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and [Alabama Graphite Corp.](http://www.alabamagraphite.com) undertakes no obligation to update forward-looking statements (unless required by law) if these beliefs, estimates and opinions or other circumstances should change. Investors are cautioned against attributing undue certainty to forward-looking statements.

[Alabama Graphite Corp.](http://www.alabamagraphite.com) cautions that the foregoing list of material factors and assumptions are not exhaustive. When relying on [Alabama Graphite Corp.](http://www.alabamagraphite.com) forward-looking statements to make decisions, investors and others should carefully consider the foregoing factors and assumptions and other uncertainties and potential events. [Alabama Graphite Corp.](http://www.alabamagraphite.com) has also assumed that the material factors and assumptions will not cause any forward-looking statements to differ materially from actual results or events. However, the list of these factors and assumptions is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors.
